|---|--|--|--|
| Course Title: Transmission Line Survey            | CourseCode:SEPC302                               |  |  |
| Number of Credits:3                               | Semester: Sixth                                  |  |  |
| Teaching Scheme                                   | Examination/Scheme                               |  |  |
| Duration:15weeks                                  | MaximumMarks:100                                 |  |  |
| Theory:3hours/ week                               | Continuous internal Assessment (INT):20Marks     |  |  |
| Tutorial:Nil                                      | Assignment/ Presentation/ Quiz (AS/QZ): 10 Marks |  |  |
| Practical:Nil                                     | Attendance (ATD): 10 Marks                       |  |  |
| Total Contact Hours: 45hrs.                       | End Semester Examination (ESE):60 Marks          |  |  |

Pre-requisites : Students should have the knowledge of basic Surveying, and basic computer

applications

Course Category : PC

Course Objective

On successful completion of the course the students will be able to:

- Understand the process of Preliminary and Detailed Survey required in Transmission Line
- Know the uses the Modern Survey Instruments like Total Station, GPS, DGPS in Transmission Line Survey
- Know the uses of Survey of India Topo Map, Satellite Images, UTM Coordinates, PLSCADD Software in Transmission Line Survey

| Unit  | Course Content   | Hours/Unit | Marks |
|-------|--|------------|-------|
| Unit1 | <ul> <li>Introduction to Transmission Line Towers</li> <li>1.1 General concept on Overhead &amp; Underground Power Transmission, Transmission Line Planning</li> <li>1.2 Basic Concept of High Voltage Transmission Line, Concept of a Tower, Types and Shapes of Transmission Line Towers, Configuration &amp;, Geometry of Tower, Height of a Tower, Tower parts and various type of Insulators</li> <li>1.3 The different voltages for Power Transmission, Ground Clearance for various voltages</li> </ul> | 7          | 8     |
| Unit2 | Preliminary Survey of Transmission Lines  2.1 Concept of Topo Sheet (1:50000, 1:250000) & its Definitions, Survey of India Topo Map Numbering, UTM Zones, UTM Coordinates  | 16         | 20    |

|        | 2.2 Parts of work & Accuracy order of Survey, Skills required for Overhead Power Transmission Line Surveyor  |    |    |
|--------|--|----|----|
|        | 2.3 Beeline and Route Alignment, Reconnaissance survey, Walk<br>Over Survey, Preliminary Survey field work, Way leave & Right<br>of Way  |    |    |
|        | 2.4 General Points for Route Selection, Concept of various Crossing – River, Forest, Railway, Power Transmission Line, Communication Line, NH/SH Road Crossing, Provisions of route selection near Aerodromes, Radar Stations, Rifle Ranges and Helipads                     |    |    |
|        | 2.5 Various instruments used in Survey (Theodolite, Auto Level, Total Station, GPS, DGPS, Smart Station etc.) &, their accuracies  |    |    |
|        | 2.6 Requirement of Transmission Line Routing, Usage of modern technologies (Satellite Images, Survey of India Topo Map, Aerial Photogrammetry, LiDAR) for Identification of Alternative routes, Route Alignment, Marking & Report Making and recommendation for final route. |    |    |
|        | Detailed Survey of Transmission Lines  |    |    |
|        | 3.1 General concept of Detailed Survey, Collection of Detailed Survey Data, Profiling, Wind Span, Weight Span, Ruling Span   |    |    |
|        | 3.2 Preparation of Tower Spotting Data with necessary details  |    |    |
|        | 3.3 Locating the Takeoff Tower near Sub Stations   |    |    |
| Unit 3 | 3.4 Manual Tower Spotting using Sag Templates, Sag Profiles.   | 12 | 17 |
|        | 3.5 Application of PLSCADD for optimum Tower Spotting, Minimum Clearance from Ground- Building etc.  |    |    |
|        | 3.6 Preparation of Tower Schedule, Land Schedule & ROW, Trial Pits, Soil Resistivity Data  |    |    |
|        | 3.7 Preparation of Detailed Survey Report, Check Survey, Check Survey Report   |    |    |
|        | General Knowledge of Foundation Works- Excavation & Stub-<br>Setting and Safety in TL Survey   |    |    |
| Unit 4 | 4.1 Types of Loads on Foundation, Classification of Soils, Types of Foundation & Selection of Foundation, Preparation of Foundation site, type of foundation to be adopted, Pit Marking, Excavation & Orientation of Towers, Uses of Stubs for Foundation                    |    | 15 |
|        | 4.2 General Safety Precautions, Safety measures during Field Survey Work, Route Clearance, Excavation and Foundation Works, System Stability & Environmental issues in Power Transmission.   |    |    |
| Total  | <u>I</u>   | 45 | 60 |
|        |  | 1  | I  |

#### **Suggested learning resources:**

- Electrical Power Transmission Lines- by, T. Ch. Hanuman Rao, Dr. S. Majid Ali,
   Copies of the book can be obtained on request from- T. Ch. H. Rao, 9-222/2, Plot 257,
   Employees colony, Secunderabad 500 087
- Overhead Power Lines: Planning, Design, Construction by F. Kiessling, J. F. Nolasco, P. Nefzger, and U. Kaintzyk, Springer-Verlag Berlin Heidelberg publication.
- Transmission Line Manual, CBI&P panels of experts on Transmission lines, central board of irrigation and power, New Delhi
- Electric Power Generation, Transmission and Distribution- Leonard L. Grigsby
- Transmission and Distribution- electrical Engineering- Dr. C. R. Bayliss&, B. J. Hardy Newnes...Elsevier, Linacre House, Jordan Hill, Burlington, MA 01803, USA

Course outcomes: After completing this course, the student will be able to-

- 1. Acquire introductory idea on transmission line towers, its nomenclature, geometry and configuration.
- 2. Learn the procedure to be followed during Preliminary and Detailed Survey of Transmission Lines.
- 3. Know the basic idea of foundation works required in Transmission Line Survey.
- 4. Enhance the knowledge of Safety to be followed in Transmission Line Surveying
- 5. Learn the uses of Survey of India Topo Map, Satellite Images, UTM Coordinates, PLSCADD Software in Transmission Line Survey.

| Course Title: Building Planning and Drawing       | Course Code: SEPE302/1                   |  |  |
| Number of Credits: 3                              | Semester: Sixth                          |  |  |
| Teaching Scheme                                   | Examination/Scheme                       |  |  |
| Duration: 15 weeks                                | Maximum Marks: 100                       |  |  |
| Theory: 3hours/ week                              | Continuous internal Assessment: 20 Marks |  |  |
| Tutorial: Nil                                     | Attendance: 10 Marks                     |  |  |
| Practical: Nil                                    | Assignment/ Presentation/ Quiz: 10 Marks |  |  |
| Total Contact Hours: 45hrs                        | End Semester Examination: 60 marks       |  |  |

Pre-requisites : Students should have the knowledge of Civil engineering and design concept of basic engineering components

Course Category : PE

#### **Course Objective**

On successful completion of the course the students will be able to:

- Understand the concept of the symbols, signs and conventions from the given drawing.
- Prepare line plans of residential using principles of planning.
- Prepare submission and working drawing for the given requirement of civil engineering structure.
- Understand the building by-laws related to residential building.

| Unit   | Course Content  | Hour/Unit | Marks |
|--------|---|-----------|-------|
|        |   |           |       |
| Unit 1 | Conventions and Symbols:  | 8         | 10    |
|        | Conventions as per IS 962, symbols for different materials such as earthwork, brickwork, stonework, concrete, woodwork and glass. Graphical symbols for doors and windows, Abbreviations, Types of lines-visible lines, centre-line, hidden line, section line, dimension line, extension line, pointers, arrow head or dots. Appropriate size of lettering and numerals for titles, sub-titles, notes and dimensions. Sizes of various standard papers/sheets. |           |       |
| Unit 2 | Principles of Planning of Building:  Principles of planning for Residential and Public building-Aspect, Prospect, Orientation, Grouping, Privacy, Elegance, Flexibility, Circulation, Furniture requirements, Sanitation, Economy. Plot area, built up area, super built up area, plinth area, carpet area, floor area and FAR (Floor Area Ratio).  Building By-laws:   | 14        | 17    |

|        | Important by-laws related residential building, Minimum standard dimension, building permissions   |    |    |
|--------|--|----|----|
| Unit3  | Type of Building:  Type of Building based on occupancy based on NBC(part-IV):2005, Residential building, Educational building, Institutional building, Assembly building, Business Building, mercantile Building, Industrial building, storage building, Hazardous building, Classification of Residential building as per NBC(part-IV):2005; Lodging, dwelling house, Dormitories, Apartment house, Hotels.  Planning of Residential building:  Planning of standard living room, Dining room, Bed room, Bath and water closet, Kitchen, Stair of residential building  | 10 | 10 |
| Unit 4 | Basic components of Building Elements:  The basic concepts of building elements, Simple sectional view of different building components, Foundation, Purpose of foundation, Type of foundation, Selection of foundation, Masonry Wall, Classification of masonry wall, Brick masonry, Size and Shape of brick, Different types of bond, Stretcher, Header, English and Flemish bond, Door, part of Door, Window, Part of Windows, Planning and design of staircase- Rise and Tread for residential building, Flooring, Different type of flooring used in building. Load bearing structure, frame Structure, comparison of load bearing and frame structure. | 9  | 15 |
| Unit 5 | Site selection of residential building:  Topography of site, shape of site, nature of sub-soil, position of groundwater table, Facilities, availability of men and material, thing to be avoided near site.  | 4  | 8  |
| Total  |  | 45 | 60 |

#### **Suggested learning resources:**

- Bhavikatti.S.S. and Chitwadagi, M.V., Building Planning and Drawing, I.K. International Publishing House Pvt. Ltd.
- Shah. M.G. Kale, CM, Patki, S.Y., Building Drawing, Mcgraw Hill Publishing company Ltd. New Delhi.
- Malik and Mayo, Civil Engineering Drawing, Computech Publication Ltd New Asian Publishers, New Delhi.
- M. G. Shah and C. M. Kale, Principles of Perspective Drawing, Mcgraw Hill Publishing company Ltd. New Delhi.
- Swamy, Kumara; Rao, N, Kameshwara, A., Building Planning and Drawing, CharotarPublication, Anand.
- Bhavikatti, S. S., Building Construction, Vikas Publication House Pvt. Ltd., New Delhi.

- Mantri, Sandip, A to Z Building Construction, Satya Prakashan, New Delhi.
- IS 962 and NBC(part-IV):2005

**Course outcomes:** After completing this course, the student will be able to –

- 1. Interpret the symbols, signs and conventions from the given drawing.
- 2. Prepare line plans of residential buildings using principles of planning.
- 3. Prepare submission and working drawing for the given requirement of civil engineering structure.

| Total Contact Hours: 45hrs.                       | End Semester Examination (ESE):60marks           |  |  |  |

Pre-requisites : Students should have the knowledge of construction work.

Course Category : PE

Course Objective

On successful completion of the course the students will be able to:

- Understand the importance of various safety guidelines of construction works.
- Understand various hazards occur in construction works.
- Find out the remedies to prevent various hazards which occur in construction works.

| Unit  | Course Content   | Hour/Unit | Marks |
|-------|--|-----------|-------|
|       | Introduction:  |           |       |
| Unit1 | History and Development of Safety Movement, Importance of            | 5         | 10    |
| Cinti | Safety, Safety Policy: Safety Organization and its responsibilities. |           |       |
|       | Physical, Physiological and Psychological factors of safety. Safety  |           |       |
|       | Education and Training.  |           |       |
|       | Workplace hazards and its prevention methods:                        |           |       |
|       | Fire Hazards:  |           |       |
|       | Chemistry of Fire, Classification of Fire. Common Causes of          |           |       |
| Unit2 | Industrial Fire. Statutory Provisions regarding Fire Safety, Factors | 15        | 15    |
|       | Contributing Towards Fire.   |           |       |
|       | Determination of Fire Load. Fire Resistance of Building Materials.   |           |       |
|       | Design of Industrial Plant for Fire Safety. Prevention of Fire:      |           |       |
|       | Portable Extinguishers- Water Type Extinguisher, Carbon dioxide      |           |       |

|       | Type Extinguisher, Foam Type Extinguisher, Dry Chemical Type Extinguisher. Sprinkle Systems, CO <sub>2</sub> Flooding System Foam Flooding System. Industrial Fire Detection and Alarms. Special Precautionary Measures in Handling/Processing Flammable Liquids, Gases, Vapours, Mists and Dusts. Emergency Action Plan.  |    |    |
|-------|--|----|----|
|       | Construction Hazards   |    |    |
|       | Safe Operating Procedure (SOP) and Code of Practice (COP) for<br>Various Civil Works, Works at Heights and Various Safe<br>Conditions Including Fall Protection and Preventive Measures.<br>Personal Protective Aids for Working at Construction Site. Permit<br>to Work System.   |    |    |
|       | Mining Hazards   |    |    |
|       | Mine Rules and Regulations (CMR 2017 and MMR 1961), Specific Statutory Provisions from DGMS Circulars, Mine Act, Bye Laws for Safe Mining. Permit to Work System.  |    |    |
|       | Hazards in survey works  |    |    |
|       | Various types of hazards in survey works, Safety precaution in survey works. Precaution adopted in survey related works associated with Transmission towers, railways, power plants, transformer installations. safety requirements while working at height, prevention of falls at floor level. Precautions from falling of materials.  |    |    |
| Unit3 | Hygiene Concept, definition and importance of hygiene in construction industry: Difference between domestic hygiene and industrial hygiene. Physical hazards – heat stress and its control, ventilation, noise, vibration, illumination, thermal radiation, X rays, ultra violet radiation, ionizing and non-ionizing radiations, sensitization to different air, water and waste water, soil contaminant related to construction industries, permissible exposure limits, effects of exposure, preventive and control measures. | 8  | 10 |
| Unit4 | Industrial safety legislations  Legislative Measures in Industrial Safety: Factories Act, 1948, Workmen's Compensation Act, 1943, Employees State Insurance Act, 1948. Water (Prevention and Control) Pollution Act, 1974,. Child Labour and Women Employee Act.   | 12 | 15 |
|       | ILO Convention and Recommendations in the Furtherance of Safety, Health and Welfare.   |    |    |

|       | Occupational Safety, Health and Environment Management: Bureau of Indian Standards on Safety and Health 14489 - 1998 and 15001 – 2000 OSHA(Occupational Safety and Health Administration).   |    |    |
|-------|--|----|----|
| Unit5 | Safety Management Safety Management- Principles &Practices with Case Studies, Role of Management in Industrial Safety.  Safety Organization: Role of Safety Committee and its Formation, Safety Awareness Programme: Motivation, Education and Training, Appraisal of Industrial Safety and Measurement of Safety Performance. | 5  | 10 |
| Total |  | 45 | 60 |

#### Suggested learning resources:

- ISO 14001
- ISO 45001:2018/OHSAS 18001
- ILO Legislation
- Jha, N. Kumar, Patel, Dilip A, Singh Amarjit, Cosntruction Safety Management, Pearson India Education Seervices Pvt. Ltd, Noida, UP.
- Haldar, S.K., Occupational Health & Hygiene in Industry, CBS Publishers
- Das, Akhil Kumar, Principles of Industrial Safety Management by, PHI

#### **Course outcomes:** After completing this course, student will be able to:

- Understand the basic philosophy of safety engineering
- Interpret the existing safety engineering guidelines and recommendations
- Identify various safety requirements in construction and associated sectors.
- Understand hygiene and safety associated with construction industries
- Analyze the problems related to safety hazard and contaminant discharge from construction industries and to suggest remedial measures.

| Theory:3hours/ week                               | Continuous internal Assessment (INT):20Marks     |  |  |
| Tutorial:Nil                                      | Assignment/ Presentation/ Quiz (AS/QZ): 10 Marks |  |  |
| Practical:Nil                                     | Attendance (ATD): 10 Marks                       |  |  |
| Total Contact Hours: 45hrs.                       | End Semester Examination (ESE):60marks           |  |  |

Pre-requisites : Students should have the knowledge of basic Surveying, drawing and sketching

Course Category : PE

Course Objective

On successful completion of the course the students will be able to:

- Understand the importance and the basic guidelines of town planning.
- Learn the basic concept of zoning and various aspects of town planning.
- Learn the application of Survey Engineering and Building Bye-Laws for preparation of the development plans in Town Planning.
- Understand the requirements of urban roads and traffic management in town planning.

| Unit  | Course Content  | Hour/Unit | Marks |
|-------|---|-----------|-------|
| Unit1 | <ul> <li>1.0 Introduction</li> <li>1.1 Objects, Principles and Necessity of Town Planning</li> <li>1.2 Origin and Growth of Towns, Distribution of land uses,</li> <li>Forms of planning, Important features of the site of a town</li> </ul> | 6         | 10    |
| Unit2 | <ul> <li>2.0 Town Planning Surveys</li> <li>2.1 Necessity and types of Survey in Town Planning</li> <li>2.2 Collection of Data and Methods of data collection,<br/>Drawings and Report of Town planning Surveys</li> </ul>                    | 10        | 15    |
| Unit3 | 3.0 Zoning  3.1 Objects, Principle, Advantage and Importance of Zoning.   | 8         | 10    |

|       | 3.2 Requirements and classification of: Housing, Public   |    |    |
|-------|---|----|----|
|       | Buildings, Industries, Parks and Playgrounds  |    |    |
|       | 4.0 Building Bye-Laws and Development Plan  |    |    |
|       | 4.1 Objects and Applicability of Building Bye-Laws  |    |    |
| Unit4 | 4.2 Principles underlying Building Bye-Laws, Set-Back,<br>Light Plane, Floor Space Index, Minimum Plot Sizes,<br>Margin and Maximum Built-Up Area                           | 12 | 15 |
|       | <ul><li>4.3 Objects and necessity of Development Plan</li><li>4.4 Required data, drawings and report for Development Plan</li></ul>   |    |    |
|       | 5.0 Urban Roads and Traffic Management  |    |    |
| Unit5 | 5.1 Objects, Requirements and Classification of Urban Roads, Types of street systems  | 9  | 10 |
|       | 5.2 Objects of Traffic Management, Traffic Surveys, Road<br>junctions and intersections, Parking, Traffic Signals,<br>Road Signs, Road Markings, Street lighting in a town. |    |    |
| Total |   | 45 | 60 |
| L     |   |    |    |

#### **Suggested learning resources:**

- Town Planning by S C Rangwala, Charotar Publishing House
- Fundamentals of Town Planning by G. K. Hiraskar, Dhanpat Rai Publishing
- Urban Planning in India by Amiya Kumar Das, Rawat Publications
- Urban Planning Theory and Practice by Rao M. P., CBS Publishers
- Introduction to Urban Development and PlanningbyB. K. Pattanaik, SAGE Publications

#### Course outcomes: After completing this course, the student will be able to-

- 1. Understand the importance and significance of various features of town planning.
- 2. Use the basic guidelines of town planning in zoning.
- 3. Apply the basic knowledge of Surveying in Town Planning.
- 4. Use the knowledge of Building Bye-Laws for preparation of the development plans in Town Planning.
- 5. Learn the basic requirements and classification of urban roads and its significance in town planning.
- 6. Learn the various aspects of traffic management and its application in town planning.

Content

Seminar is intended to provide opportunity to the student to present a project related work or any subject related topic given by respective faculties in front of a technical gathering with the help of different oral, aural and visual communication aids. In the seminar students are expected to defend the project or topic while answering questions arising out of their presentation.

#### Course Outcomes:

Upon completion of this course student should be able to Present given topic in a seminar using different audio visual method.

|----------------|---|------------------------------|
|                | and sketching.                          |                              |

Course Category : Project

Course Objectives

On successful completion of the course the students will be able to:

| Read a topographical map and understand its uses in planning of a township.              |
|--|
| Understand the procedures of land development and planning required in a small township. |
| Prepare report including drawing using the surveyed data collected in the field.         |
| Enhance knowledge to represent the surveyed data.  |

| Sl.No.  | Assignments/Practical  |  |  |
|---------|--|--|--|
| Land Do | Land Development & Planning of a Small Township on a topographical map   |  |  |
|         | Field and Laboratory works of the project  |  |  |
|         | 1.1 Arrangement of a topographical map of an area not less than 1 sq. km. (preferably prepared by indirect contouring method at Annual Survey Training Camp) |  |  |
|         | 1.2 Collection of Socio-economic, rainfall, High Flood Level data of the area.   |  |  |
| 1       | 1.3 Zoning, Preparation of Master Plan with division of Sectors, Streets on the topographic map for the proposed township.                                   |  |  |
|         | 1.4 Preparation of Street map and any one of the water supply map, surface drains map and power supply map   |  |  |
|         | 1.5 Land development work, Quantity and rough cost estimate of earth work required in  |  |  |

|   | different zones  |
|---|--|
|   |  |
|   |  |
|   |  |
|   |  |
|   | Preparation of the Project Report  |
|   | The project report should include the following information:   |
|   | 2.1 Introduction   |
|   | 2.2 Necessity and back ground of the township  |
|   | 2.3 Representation of Socio-Economic survey, rainfall, High Flood Level data (Pie Chart and Bar Chart of the data may be prepared by using Ms-Excel)   |
|   | 2.4 Land development work along with the following:  |
| 2 | i) Allocation of land for use of different purpose, ii) Quantity and rough cost Estimate for earth work-cutting, filling, leveling, surface dressing in different zones  |
|   | 2.5 Overall benefit of the project   |
|   | 2.6 Conclusion and recommendation  |
|   | 2.7 The following maps are to be submitted along with the report:  |
|   | <ul> <li>i) Topographical map used in the project (Prepared at annual survey training camp),</li> <li>ii) Master plan of the township (Plan shown only: division of sectors, location of streets),</li> <li>iii) Proposed Street map and any one of the: water supply map, surface drains map and power supply map.</li> </ul> |

#### Suggested learning resources

- Surveying and Levelling (Vol.1 &, 2)by S. K. Duggal, TATAMcGRAW-HILL
- Surveying(Vol.1&,2)by Dr.K.R.Arora, STANDARDBOOK HOUSE
- Surveying and Levelling by N.N. Basak, TATAMcGRAW-HILL
- Surveying and Levelling(Vol. 1 &,2)byDr. B.C. Punmia,Laxmi Publication

#### **Course outcomes:**

After completing this course, the student will be able to-

- Read a topographical map and use it in the planning of a township.
- Learn the procedures of necessary survey work required for the project.
- Compute necessary survey data from map and from field observation.
- Prepare a lay out of a new township on a topographical map.
- Prepare the lay outs of streets and various other required components of a township on a topographical map.
- Grow the knowledge on the preparation and presentation of a project report.

Pre-requisites : Students should have the knowledge of basic surveying with drawing and sketching.

Course Category : PC

Course Objectives

On successful completion of the course the students will be able to:

- $\hfill \square$  Measure necessary observation with the survey instruments
- ☐ Compute and record necessary survey data from field observation for drawing.
- ☐ Prepare drawing using survey data.

| INSTR  | INSTRUCTIONS:  |  |  |
|--------|--|--|--|
| Sl.No. |  |  |  |
| 1.     | Group size for survey practical work may be formed by subject teacher  |  |  |
| 2.     | Each student from a group should handle the instrument independently to understand the function of different components and use of the instrument.   |  |  |
| 3.     | Drawing and plotting should be considered as part of practical.  |  |  |
| 4.     | Term work shall consist of record of all practical and projects in field book and drawing of Project work on full/half imperial size drawing sheets. |  |  |

| SI.I | No. | Assignments/Practical   | Remarks |
|------|-----|---|---------|
| 1    |     | Direct Contouring Method using Plane Table ,Auto Level and Theodolite / Total Station |         |

| 2 | Preparation of Topo-Map (of an area not less than 1 sq. km) applying the concept of Indirect contouring by square method using Auto level, Theodolite or Total Station |                                  |
|---|--|----------------------------------|
| 3 | Indirect contouring of a hilly area by Total Station / Tacheometer.  |                                  |
| 4 | Minor triangulation with single chain of triangle  | Classes may be conducted at the  |
| 5 |  | beginning of the semester at any |
| 6 |  | suitable location.               |
| 7 | Map preparation of Institute Premises using GPS/ DGPS.   |                                  |

#### **Suggested learning resources:**

• Surveying Vol. I, II and III by Dr. K. R. Arora. Standard Book House, Delhi.

**Course outcomes:** After completing this course, student will be able to –

- Prepare direct and indirect contour maps.
- Prepare topographical map of an area.
- Establish horizontal control points using triangulation and trilateration.
- Learn the use of Total Station and Theodolite in a road survey.
- Learn the procedure and use of GPS in map preparation.

|---------------------|--------------------------------|
| Course Code         | HS 302                         |
| Number of Credits   | 3                              |
| Pre Requisites      | None                           |
| Total Contact Hours | 3(L: 2; T: 1)/week = 45 hrs    |
| Course Category     | HS                             |

#### **Course Learning Objectives**

- 1. To raise awareness, knowledge and understanding of enterprise/entrepreneurship.
- 2. To motivate and inspire students toward an entrepreneurial career.
- 3. To understand venture creation process and to develop generic entrepreneurial competences.
- 4. To introduce students to the basic steps required for planning, starting and running a business.
- 5. To familiarise students with the different exit strategies available to entrepreneurs.

#### **Course Outcomes:**

After completing the course students will able to:

|      | Identify qualities of entrepreneurs, develop awareness about entrepreneurial |  |  |
|------|--|--|--|
| CO 1 | skill and mindset and express knowledge about the suitable forms of          |  |  |
|      | ownership for small business   |  |  |
| CO 2 | Comprehend the basics of Business idea, Business plan, Feasibility Study     |  |  |
| CO 2 | report, Project Report and Project Proposal                                  |  |  |
| CO 3 | Understand the concept of start-up business and recognise its challenges     |  |  |
| CO 3 | within legal framework and compliance issues related to business.            |  |  |
| CO 4 | Make a Growth Plan and pitch it to all stakeholders and compare the various  |  |  |
| CO 4 | sources of funds available for start-up businesses                           |  |  |

#### **Detailed Course Content**

| Unit | Name of the Topic   | Hours |
|------|---|-------|
|      | ENTREPRENEURSHIP – INTRODUCTION AND PROCESS   |       |
| 1.   | <ul> <li>Concept, Competencies, Functions and Risks of entrepreneurship</li> <li>Entrepreneurial Values&amp; Attitudes and Skills</li> <li>Mindset of an employee/manager and an entrepreneur</li> <li>Types of Ownership for Small Businesses</li> </ul> | 10    |
|      | <ul><li>Sole proprietorship</li><li>Partnerships</li></ul>  |       |

|    | companies   |    |
|----|---|----|
|    | Difference between entrepreneur and Intrapreneur  |    |
|    |   |    |
|    | PREPARATION FOR ENTREPRENEURIAL VENTURES  |    |
| 2. | <ul> <li>Business Idea- Concept, Characteristics of a Promising Business Idea, Uniqueness of the product or service and its competitive advantage over peers.</li> <li>Feasibility Study – Concept – Locational, Economic, Technical and Environmental Feasibility. Structure and Contents of a standard Feasibility Study Report</li> <li>Business Plan – Concept, rationale for developing a Business Plan, Structure and Contents of a typical Business Plan</li> <li>Project Report- Concept, its features and components</li> <li>Basic components of Financial Statements- Revenue, Expenses (Revenue &amp; capital exp), Gross Profit, Net Profit, Asset, Liability, Cash Flow, working capital, Inventory. Funding Methods-Equity or Debt.</li> <li>Students are just expected to know about the features and key inclusions under, Business Plan and Project Report. They may not be asked to prepare a Business Plan/ Project Report/ Project Feasibility Report in the End of Semester Examination.</li> </ul> | 20 |
|    | ESTABLISHING SMALL ENTERPRISES  |    |
| 3. | <ul> <li>Legal Requirements and Compliances needed for establishing a         New Unit-</li></ul>   | 03 |
|    | START-UP VENTURES  Concept & Features  Mobilisation of resources by start upg: Financial Human  |    |
| 4. | <ul> <li>Mobilisation of resources by start-ups: Financial, Human, Intellectual and Physical</li> <li>Problems and challenges faced by start-ups.</li> <li>Start-up Ventures in India – Contemporary Success Stories and Case Studies to be discussed in the class.</li> <li>Case studies have been included in the syllabus to motivate and inspire students toward an entrepreneurial career from the success stories. No questions are to be set from the case studies.</li> </ul>   | 04 |

| 5. | <ul> <li>FINANCING START-UP VENTURES IN INDIA</li> <li>Communication of Ideas to potential investors – Investor Pitch</li> <li>Equity Funding, Debt funding – by Angel Investors, Venture Capital Funds, Bank loans to start-ups</li> <li>Govt Initiatives including incubation centre to boost start-up ventures</li> <li>MSME Registration for Start-ups –its benefits</li> </ul> | 06 |
|----|---|----|
| 6. | <ul> <li>EXIT STRATEGIES FOR ENTREPRENEURS</li> <li>Merger and acquisition exit, Initial Public Offering (IPO),</li> <li>Liquidation, Bankruptcy – <u>Basic Concept only</u></li> </ul>   | 02 |

#### **Examination Scheme**

#### **\*** End Semester Examination: 60 marks

Suggested Question Paper Scheme for End Semester Examination

#### **Group A: 20marks**

| Question Type                 | Number of questions to | Number of questions to |
|-------------------------------|------------------------|------------------------|
| Question Type                 | be set                 | be answered            |
| MCQ, Fill in the blanks, True |                        |                        |
| or False ( Carrying 1 mark    | 25                     | 20                     |
| each)                         |                        |                        |

#### **Group B: 40marks**

| Question Type                                     | Number of questions to | Number of questions to |
|---|------------------------|------------------------|
|   | be set                 | be answered            |
| Subjective Type questions (Carrying 8 marks each) | 10                     | 5                      |

#### **❖** Internal Assessment: 40 marks

Class test: 20 marks
Assignment: 10 marks
Class attendance: 10 marks

# Syllabus of Engineering Economics & Project Management

| Course Code:    | OE302                             |
|-----------------|-----------------------------------|
| Course Title:   | Engineering Economics & Project   |
|                 | Management                        |
| No. of Credits: | 3 (L: 3, T: 0, P: 0)              |
| Prerequisites:  | NIL                               |
| Course          | Open Elective (Compulsory for all |
| Category:       | branches)                         |
|                 | ,                                 |

#### Course Objectives:

- To acquire knowledge of basic economics to facilitate the process of economic decision making.
- To acquire knowledge on basic financial management aspects.
- To develop the idea of project plan, from defining and confirming the project goals and objectives, identifying tasks and how goals will be achieved.
- To develop an understanding of key project management skills and strategies.

#### **Group-A**

#### Unit-I (INTRODUCTION, THEORY OF DEMAND & SUPPLY) [9 hours]

- 1.1 Introduction to Engineering Economics, the relationship between Engineering and Economics
- 1.2 Resources, scarcity of resources, and efficient utilization of resources.
- 1.3 Opportunity cost, Rational Choice Theory

#### 1.4 Theory of Demand:

- The law of demand
- Different types of demand (Individual demand & Market demand)
- Determinants of demand
- Demand function
- Change in demand (Shift of demand curve) and the change in quantity demanded.
- Definition and types of Elasticity of demand (price, income & cross price elasticity) with mathematical derivation, Concept of elastic and inelastic goods, Measurement of price elasticity of demand (Point elasticity and Arc elasticity), Variation of price elasticity on different points of a linear demand curve, ranging from zero to infinity, Relationship between price, total revenue and price elasticity of demand (mathematical derivation).

#### 1.5 Theory of Supply:

- Definition of supply
- Determinants of supply
- Supply function
- Supply curve and shift of supply curve.

#### 1.6 Market mechanism:

- Definition of Market
- Price mechanism: determination of equilibrium price and quantity demand & supply (Numerical examples with graphical illustration).
- Stability of equilibrium.
- Basic comparative static analysis: Change in equilibrium due shift of demand & supply curve (Numerical problems with graphical illustration).

#### **Unit-II (THEORY OF PRODUCTION & COSTS) [10 hours]**

- 2.1: **Theory of Production:** Concept of production (goods & services), Different factors of production (fixed and variable factors), Short-run Production function (Graphical illustration), law of return (graphical and mathematical derivation), and Long run production function (returns to scale).
- 2.2: **Theory of Cost:** Short-run and long-run cost curves with graphical illustration, basic concept on total cost, fixed cost, variable cost, marginal cost, average cost etc. with the diagrammatic concept., Relationship between AC AND MC.
- 2.3: Economic concept of profit, profit maximization (numerical problems)

## UNIT-III (DIFFERENT TYPES OF MARKET AND ROLE OF GOVERNMENT) [4 hours]

- 3.1: Perfect Competition: Features of Perfectly Competitive Market.
- 3.2: Imperfect Competition: Monopoly, Monopolistic Competition, and Oligopoly.
- 3.3: Role of government in Socialist, Capitalist and Mixed Economy structure with example.

#### **Group-B**

#### Unit-I (CONCEPT OF PROJECT) [4 hours]

- 1.1: Definition and classification of projects
- 1.2: Importance of Project Management.
- 1.3: Project life Cycle [Conceptualization→Planning→Execution→Termination]

#### **Unit-II (FEASIBILITY ANALYSIS OF A PROJECT) [10 hours]**

- 2.1: Economic and Market analysis.
- 2.2: Financial analysis: Basic techniques in capital budgeting Payback period method. Net Present Value method. Internal Rate of Return method.
- 2.3: Environmental Impact study adverse impact of the project on the environment.
- 2.4: Project risk and uncertainty: Technical, economical, socio-political, and environmental risks.
- 2.5: Evaluation of the financial health of a project Understanding the basic concept of Fixed & Working Capital, Debt & Equity, Shares, Debentures etc., and different financial ratios like Liquidity Ratios, Activity Ratios, Debt-equity ratio & Profitability Ratio (Basic concept only).

N.B: Knowledge of financial statements is not required; for the estimation of ratios the values of the relevant variables will be provided.

#### Unit-III (PROJECT ADMINISTRATION) [8 hours]

- 3.1: **Gantt Chart** a system of bar charts for scheduling and reporting the progress of a project (basic concept).
- 3.2: Concept of Project Evaluation and Review Technique (PERT) and Critical Path method (CPM): basic concept and application with real-life examples.

#### **Examination Scheme:**

- A. Semester Examination pattern of 60 marks:
- 1. Objective type Question (MCQ, Fill in the blanks, and Very Short question-1 mark each): At least five questions from each unit. [Total marks: 20]
- 2. Subjective questions: Five questions to be answered taking at least two from each group. [Total marks: 5x8=40]
- B. Assignment (10 Marks)

#### Guideline for Assignment (10 Marks)

Students may be instructed to prepare a report on a project (preferably the based on the Major Project in 6th Semester), using a popular project management software in IT/Computer Laboratory, under the guidance of the Lecturer in Computer Science & Technology and Lecturer in Humanities.

- C. Class Test: Two examinations 20 marks each. Take best of two.
- D. Attendance: 10 Marks

#### Suggested reference books:

- 1. Principles of Economics Case and Fair, Pearson Education Publication
- 2. Principles of Economics Mankiw, Cengage Learning
- 3. Project planning, analysis, selection, implementation and review Prasannachandra Tata McGraw Hill.
- 4. Project Management Gopala krishnan Mcmillan India Ltd

#### **Proposed Syllabus for Electric Vehicle Technology**

| Course Code                 | OE II                            |
|-----------------------------|----------------------------------|
| Course Title                | Electric Vehicle Technology      |
| Number of Credits and L-T-P | 3 [L – 2, T – 1, P – 0]          |
| Course Category             | PC                               |
|                             | Basic Electrical and Electronics |
| Prerequisites               | Engineering Mechanics            |
|                             | Strength of Materials            |

#### Course objectives: -

After completing this course, the students will be able

- To understand the basics of electric vehicle history and components.
- To understand properties of batteries.
- To understand the electrical machine properties and classifications.
- To understand the properties of electric vehicle drive systems
- To understand the concepts of hybrid electric vehicles.

| Unit | Contents  | No of<br>Classes |
|------|---|------------------|
| 1    | <ul> <li>Introduction</li> <li>1.1 History of Hybrid and Electric Vehicles;</li> <li>1.2 Social and Environmental importance of Hybrid and Electric Vehicles;</li> <li>1.3 Basic Components,</li> <li>1.4 Vehicle mechanics: <ul> <li>1.4.1 Roadway fundamentals,</li> <li>1.4.2 Vehicle kinetics,</li> <li>1.4.3 Dynamics of vehicle motion; Propulsion System Design.</li> </ul> </li> </ul>  | 6                |
| 2    | <ul> <li>Battery:</li> <li>2.1 Introduction to Energy Storage – Cell and Battery fundamentals, Battery capacity, Open circuit voltage and Terminal voltage, Charge/Discharge rate, State of charge/discharge, Depth of discharge, Battery energy density &amp; Specific energy, Battery power density &amp; Specific power, Battery efficiency.</li> <li>2.2 Different traction batteries – Lead Acid battery, Nickel based batteries, Sodium based batteries and Lithium based batteries – Li- ion&amp; Li-poly.</li> <li>2.3 Battery Management System – Definition, Parts: Power Module, Battery, DC/DC Converter, Load, Communication channel, Battery Pack Safety</li> <li>2.4 Troubleshooting of EV Batteries.</li> </ul> | 10               |

|   | DC Electrical Machines:  |    |  |
|---|--|----|--|
|   | 3.1 Basic concept of DC Electric motors, Types, Power & torque           |    |  |
|   | generation, Power-flow diagram and braking in motors.                    |    |  |
|   | 3.2 DC Motors  |    |  |
|   | 3.2.1 Basic Construction & Principle of Operation, Brushless &           |    |  |
|   | Brushed DC Motor   |    |  |
| 3 |  | 8  |  |
|   | 3.2.2 Torque equation and Torque-speed characteristic of a DC motor      |    |  |
|   | 3.2.3 Regenerative braking of a DC motor                                 |    |  |
|   | 3.2.3 Permanent Magnet Brushless DC Motor(Basic concept only)            |    |  |
|   | 3.3 Advantages & disadvantages of DC Electrical Machines                 |    |  |
|   | 3.4. Applications in connection to EVs                                   |    |  |
|   | 3.5 Troubleshooting of DC Electrical Machines                            |    |  |
|   | AC Electrical Machines:  |    |  |
|   | 4.1 Three phase AC Induction Motor                                       |    |  |
|   | 4.1.1 Basic Construction & Principle of Operation                        |    |  |
|   | 4.1.2 Synchronous speed, Slip, Simplified Torque expression and          |    |  |
|   | Torque-slip Characteristics  |    |  |
|   | 4.1.3 Per-phase equivalent circuit of an Induction Motor                 | 0  |  |
| 4 | 4.1.4. Speed control methods   | 8  |  |
|   | 4.1.5. Regenerative braking of an Induction motor                        |    |  |
|   | 4.2 Permanent Magnet Synchronous Motor(Basic concept only)               |    |  |
|   | 4.3 Switched Reluctance motor(Basic concept only)                        |    |  |
|   | 4.4 Advantages & disadvantages of AC Electrical Machines                 |    |  |
|   | 4.5 Applications in connection to EVs                                    |    |  |
|   | 4.6 Troubleshooting of AC Electrical Machines                            |    |  |
|   | Electric Vehicle Drive Train:  |    |  |
| 5 | 5.1 Transmission configuration: Components: Georg Differential Clutch    | 4  |  |
| 5 | 5.1 Transmission configuration; Components: Gears, Differential, Clutch, | 4  |  |
|   | Brakes; Regenerative braking, Motor sizing; Fuel efficiency analysis.    |    |  |
|   | Hybrid Electric Vehicles:  |    |  |
|   | 6.1 Types: Parallel, Series, Parallel and Series configurations;         |    |  |
| 6 | 6.2 Drive train; Sizing of components;                                   | 6  |  |
|   | 6.3 Basics of Micro, Mild, Mini, Plug-in and Fully hybrid.               |    |  |
|   | old Zubieb of Mileto, Milia, Milia, I lag in und I uny nyolid.           |    |  |

#### Weightage distribution

| Group Name | <b>Unit Number</b> | Weightage (%) |
|------------|--------------------|---------------|
| A          | 1                  | 10            |
|            | 2                  | 20            |
| В          | 3                  | 25            |
|            | 4                  | 25            |
| С          | 5                  | 10            |
|            | 6                  | 10            |

#### **Course Outcome:**

At the end of the course, the student will be able to:

| CO1 | Understand the basics of electrical vehicle history and components.                        |
|-----|--|
| CO2 | To understand properties of batteries as energy storage device for Electric Vehicles.      |
| CO3 | To understand working and properties of different electrical motors in connection to their |
|     | applications in Electric Vehicles.   |
| CO4 | Understand the properties of electrical vehicle drive systems.                             |
| CO5 | Understand the concepts of hybrid electric vehicles.                                       |

|                                     |             |                     |             |                                 | Total         | 100      |

**Pass Criterion:** Students have to obtain at least 40% marks (pass marks) in both internal assessment and end semester examination separately.

**Assignment / Student Activity:** Submission of Home assignment, submission of report after conducting site visit/ industry visit/ micro-project / market survey / internet search on specific topic, preparation of chart, creation of innovative model or present seminar on specific topic which is suitable for the given subject as per instruction of subject teacher.

#### 1. Course Outcomes:

- 1. Explain the importance of management process in Business.
- 2. Understand different types of organization, Objectives and functions of management.
- 3. Understand the functional areas of management relating human resources, Materials, Finance.
- 4. Apply various rules and regulations concerned with Business & Social Responsibilities of the Technician
- 5. Identify various components of management
- 6. Find the economic order quantity (EOQ) for given situation.
- 7. Apply beak even analysis for optimum production
- 8. Apply principles of safety in industrial activities.

#### 2. Theory Components:

| Unit     |    | Topics                                    | Teaching |
|----------|----|---|----------|
|          |    |   | Hours    |
| Unit: 1  |    | 1.1. Types of Business                    | 04       |
| Overview | Of | -Service                                  |          |
| Business |    | -Manufacturing                            |          |
|          |    | -Trade                                    |          |
|          |    | 1.2. Industrial sectors                   |          |
|          |    | Introduction to:                          |          |
|          |    | -Engineering industry                     |          |
|          |    | -Process industry                         |          |
|          |    | -Textile industry                         |          |
|          |    | -Chemical industry                        |          |
|          |    | -Agro industry                            |          |

### WEST BENGAL STATE COUNCIL OF TECHNICAL & VOCATIONAL EDUCATION AND SKILL DEVELOPMENT

[A Statutory Body under West Bengal Act XXVI of 2013] (Formerly West Bengal State Council of Technical Education)

"Karigori Bhavan", 4<sup>th</sup> Floor, Plot No. B/7, Action Area-III, New Town, Rajarhat, Kolkata-700160

| Name of the Course: Diploma in Engineering |  |  |  |  |
|--|--|--|--|--|
| Category: Open Elective                    | Semester : Sixth   |  |  |  |
| Code no. :                                 | Theory: 100 Marks  |  |  |  |
| Course Title : Industrial Safety           | Examination Scheme:  |  |  |  |
| Duration :16 weeks                         | (i) External Assessment : 60 marks (End Semester Examination)    |  |  |  |
| Total lecture class/week: 3                | (ii) <b>Internal Assessment: 40</b> marks [Class test : 20 marks |  |  |  |
| Credit: 3                                  | Assignment, viva voce : 10 marks<br>Class attendance : 10 marks] |  |  |  |

**Pass Criterion:** Students have to obtain at least 40% marks (pass marks) in both internal assessment and end semester examination separately.

#### 1. Course outcomes (COs):

By the end of this course, a student should be able to:

- 1. Understand the various basic concepts of Hazard, Risk, and Accidents in various industries and their management.
- 2. Understand the various effects of physical hazards on human health and the various control measures to rectify the same.
- 3. Understand and identify various hazards in industries and the impact of damages in these areas.
- 4. Understand the various fire prevention techniques to be followed in various industries.
- 5. Evaluate workplace to determine the existence of occupational safety and health hazards.
- 6. Explain important legislations related to Health, Safety and Environment
- 7. Understand and implement statutory requirements mentioned in factories act for the prevention of accidents.

Besides the above this course would equip the students to effectively employ hazard analysis techniques in Industry and helpful to prevent the accidents in Industry.

#### 2. Theory Components:

The following topics/subtopics should be taught and assessed for achieving the course outcomes to attain the identified competency.

| UNIT                                     | Topics & Sub-topics   |   |  |
|--|---|---|--|
| UNIT 1 INTRODUCTION TO INDUSTRIAL SAFETY | History and Development of Safety Movement, Importance of Safety, Safety Policy: Safety Organization and Its Responsibilities, Accident Sequence Theory, Causes of Accidents, Accident Prevention and Control Techniques Including Near Misses. Risk, Hazards and Dangerous Occurrences. First Aid. Financial Costs-Direct And Indirect | 4 |  |

|   | Costs of Accidents.  |    |
|---|--|----|
| UNIT 2 INDUSTRIAL HYGIENE               | Industrial Hygiene – Principles and its Control Measures.Permissible Limits. Stress, Exposuresto Heat, Heat Balance, Effects of Heat Stress, ChemicalAgents, Flammables, Explosives- Types, Water Sensitive Chemicals, Oxidants, GasesUnder Pressure, Chemicals Causing Health Hazards: Irritants, Asphyxiates, Anaesthetics, Poisons and Carcinogens.Air Sampling, Types of Airborne Contaminants and Their Evaluation Methods, Housekeeping and its Importance.  | 6  |
| UNIT 3                                  | Physical Hazards   |    |
| WORKPLACE<br>HAZARDS AND<br>ITS CONTROL | Illumination - Principlesand Purpose of Good Illumination. Standards of Illumination. Ventilation - Principle and Purpose of Ventilation. Classification of Ventilation (Natural and Artificial), Heat Stress - Various Indexes, Different Controls (Including Air Conditioning), Vibrationand its Control, NoisePollution and its Control, Noise Mapping, Personal Protective Aids. Safe Weight Lifting Procedure. Safe Start Up, Shut Down and Emergency Shut Down Procedures.Permit to Work System.           | 16 |
|   | Chemical Hazards  Hazardous Chemicals — Classification and its Properties, Common Hazard and Precautions for Each Class. Safety in Transportation and Bulk Storage of Hazardous Materials. Corrosion Prevention and Preventive Maintenance of Vulnerable Equipment. Safe Entry Into Confined Spaces. Permit to Work System.  |    |
|   | Electrical Hazards   |    |
|   | Dangers from Electricity. Safe Limits of Voltage and Amperage. Safe Distance from LT and HT Lines. Means of Cutting of Power Overload and Short Circuit Protection. Methods and Importance of Earthing.Earth Fault Protection. Earth Insulation and Continuity Tests. Protection Against Overvoltage.  Lighting Arrester, Flame Proof and Intrinsic Electrical Equipment, Precautions in Their Selection, Installation, Maintenance and Use. Control of Hazards due to Static Electricity.Permit to Work System. |    |
|   | Fire Hazards Chemistry of Fire, Classification of Fire. Common Causes of Industrial Fire. Statutory Provisions Regarding Fire Safety, Factors Contributing Towards Fire. Determination of Fire Load. Fire Resistance of Building Materials. Design of Industrial Plant for Fire Safety.  |    |

|                                       | Prevention of Fire:PortableExtinguishers- Water Type Extinguisher, Carbon dioxideTypeExtinguisher,Foam Type Extinguisher,Dry Chemical Type Extinguisher.Sprinkle Systems, CO <sub>2</sub> Flooding System FoamFlooding System. Industrial Fire Detection and Alarms. Special Precautionary Measures in Handling/Processing Flammable Liquids, Gases, Vapours, Mists and Dusts. Emergency Action Plan.  Construction Hazards  Safe Operating Procedure (SOP) and Code of Practice (COP) for Various Civil Works, Works at Heights and Various Safe Conditions IncludingFall Protection and Preventive Measures. Personal Protective Aids for Working at Construction Site.Permit to Work System.  Mining Hazards  Mine Rules and Regulations (CMR 2017 and MMR 1961), Specific Statutory Provisions from DGMS Circulars, Mine Act, Bye Laws for Safe Mining. Permit to Work System. |   |
|---------------------------------------|--|---|
| UNIT 4 OCCUPATIONAL HEALTH            | History of Occupational Health, Concept of Occupational Health, Occupational and Work Related Diseases, Levels of Prevention, Health Examination (Initial and Periodic), Essentials of Occupational Health Services (OHS), Personal Protective Equipment (Respiratory and Non-Respiratory), Ergonomic Controls, Risk Assessment, Risk Management and Risk Tolerance.   | 6 |
| UNIT 5 INDUSTRIAL SAFETY LEGISLATIONS | The Factories Rules, Functions of Safety Management, Legislative Measures in Industrial Safety: Factories Act, 1948, Workmen's Compensation Act, 1943, Employees State Insurance Act, 1948. Water (Prevention and Control) Pollution Act, 1974, Boiler Vessels Act. Child Labour and Women Employee Act.  ILO Convention and Recommendations in the Furtherance of Safety, Health and Welfare.  Occupational Safety, Health and Environment Management: Bureau of Indian Standards on Safety and Health 14489 - 1998 and 15001 – 2000 OSHA(Occupational Safety and Health Administration).   | 5 |
| UNIT 6 INDUSTRIAL SAFETY MANAGEMENT   | Industrial Safety: History of Safety Movement in India and Abroad. Accident-Nature& Size. Need for Safety, Legal, Humanitarian, Economic and Social Considerations. Total Loss Control Concept, Introduction to Productivity, Quality, Reliability, and Safety (PQRS) Theory.  Safety Management- Principles & Practices With Case Studies, Role of Management in Industrial Safety. Process Safety  | 5 |

| Management (PSM). Safety Organization: Role of Safety Committee and its Formation, Safety Awareness Programme: Motivation, Education and Training, Appraisal of Industrial Safety and Measurement of Safety Performance. |    |
|--|----|
| Sub Total: Total Lecture Classes   | 42 |
| No. of classes required for conducting Internal Assessment examination   | 6  |
| Grand Total :  | 48 |
|  |    |

#### 3. Suggested Home Assignments/Students' Activities: (any Five)

- i. What do you understand by safety, risks and hazards? Differentiate between risks and hazards.
- ii. What are the various causes of dangerous occurrences arising due to dust, fire and chemicals refereeing different types of industries?
- iii. Can you measure some control measures to limit the degree of hazards for factories highlighting the "permissible limits" of different pollutants?
- iv. Draw charts to impose upon safety in chemical/power/construction/mining or any other heavy industries (any two types of industries). While doing these, highlight the role of top and middle management of these organization.
- v. Draw an emergency response action plan in case of fire in any heavy industry.
- vi. Draw schematic diagram of any fixed firefighting system (sprinkler/CO2 total flooding/foam flooding system) and describe it.
- vii. Draw the labelled schematic diagram of portable fire extinguishers (showing all internal components) of DCP type, water type, CO2 type and foamtype.
- viii. Classify hazardous chemical and describe the hazards associated with them.
- ix. Draw a labelled diagram of lighting arrester fitted on a multi-storied building and describe its functional procedure.
- x. Briefly describe Factories Act, 1948 and Employees State Insurance Act, 1948.

## 4. Suggested scheme for question paper design for conducting internal assessment examination:(Duration: 45 minutes)

| Questions to be set as per Bloom's Taxonomy |                       |                      |                             |       |
|---|-----------------------|----------------------|-----------------------------|-------|
|   |                       | Distributi           | on of Theory Marks          |       |
|   | Level 1<br>(Remember) | Level 2 (understand) | Level 3<br>( Apply & above) | Total |
| Class Test - 1                              | 04                    | 08                   | 08                          | 20    |
| Class Test - 2                              | 04                    | 08                   | 08                          | 20    |

## 5. Suggested Scheme for End Semester Examination [duration 2.5 hours]

|              | A: Multiple Choice Type Questions (Carrying 1 mark each) |                    |                    |                     |  |
|--------------|--|--------------------|--------------------|---------------------|--|
| Group        | Unit   | To be Set          | To be Answered     | Total Marks         |  |
|              | 1& 2   | 07                 |                    |                     |  |
| A            | 3  | 10                 | 20                 | $20 \times 01 = 20$ |  |
|              | 4, 5 & 6   | 08                 |                    |                     |  |
|              | Total:   | 25                 | 20                 | 20                  |  |
|              |  |                    |                    |                     |  |
|              | E: Subjective Typ  | pe Questions(Carry | ying 8 marks each) |                     |  |
| Group        | Unit   | To be Set          | To be Answered     | Total Marks         |  |
|              | 1 & 2  | 2                  |                    |                     |  |
| В            | 3  | 4                  | 05                 | $08 \times 05 = 40$ |  |
|              | 4, 5 & 6   | 3                  |                    |                     |  |
|              | Total: 09 05   |                    |                    |                     |  |
| Total [A+B]: |  |                    |                    | 60                  |  |

## 6. Rubrics for the Assessment of Students Activity: (20 marks)

| Sl.<br>No. |   |        | Weightage in % |  |
|------------|---|--------|----------------|--|
| 1          | In time submission of home assignment or submission of report after conducting site visit/ industry visit/ micro-project / market survey / internet search on specific topic, preparation of chart, creation of innovative model etc. |        | 40             |  |
| 2          | Viva voce or present seminar on submitted report.   |        |                |  |
| 2a         | Communication skill   | 10     | 60             |  |
| 2b         | Technical interpretation skill  | 10     | 00             |  |
| 2c         | Answering / Conclusion with justification 40  |        |                |  |
|            |   | Total: | 100            |  |

## 7. Suggested Learning Resources:

| Sl.<br>No. | Title of Book  | Author                         | Publication          |
|------------|--|--------------------------------|----------------------|

| Prerequisites               | NIL                                  | Course Category    | OE   |
| Question<br>distribution    | As per standing norms of WBSCT&VE&SD | Marks distribution | As per standing<br>norms of<br>WBSCT&VE&SD |

#### **Course Learning Objectives:**

Following are the objectives of this course:

- To learn about various types of natural and man-made disasters.
- To know pre- and post-disaster management for some of the disasters.
- To know about various information and organisations in disaster management in India and Legal framework of disaster management.
- To get exposed to technological tools and their role in disaster management.

| Module/ Group [as per directives from WBSCT&VE&SD in | Distribution of unit |
|--|----------------------|
| framing questions of end semester]                   |                      |
| Module A/ Group A                                    | Unit I and II        |
| Module B/ Group B                                    | Unit III and V       |
| Module C/ Group C                                    | Unit IV              |

#### Course Content:

#### **Unit - I: Understanding Disaster**

Understanding the Concepts and definitions of Disaster, Hazard, Vulnerability, Risk, Capacity – Disaster and Development, and disaster management.

#### Unit - II: Types, Trends, Causes, Consequences and Control of Disasters

Geological Disasters (earthquakes, landslides, tsunami, mining); Hydro-Meteorological Disasters (floods, cyclones, lightning, thunder-storms, hail storms, avalanches, droughts, cold and heat waves) Biological Disasters (epidemics, pest attacks, forest fire);

Technological Disasters (chemical, industrial, radiological, nuclear) and Manmade Disasters (building collapse, rural and urban fire, road and rail accidents, nuclear, radiological, chemicals and biological disasters, health disaster) Global Disaster Trends – Emerging Risks of Disasters – Climate Change and Urban Disasters.

## Unit- III: Disaster Management Cycle and Framework

Disaster Management Cycle – Paradigm Shift in Disaster Management.

Pre-Disaster – Risk Assessment and Analysis, Risk Mapping, zonation and Microzonation, Prevention and Mitigation of Disasters, Early Warning System; Preparedness, Capacity Development, Awareness.

During Disaster – Evacuation – Disaster Communication – Search and Rescue – Emergency Operation Centre – Incident Command System – Relief and Rehabilitation –

Post-disaster – Damage and Needs Assessment, addressing Residual issues, Restoration of Critical Infrastructure – Early Recovery – Reconstruction and Redevelopment, IDNDR, Yokohama Strategy, Hyogo Framework of Action (HFA).

#### Unit- IV: Disaster Management in India and Legal framework of disaster management

Disaster Profile of India - Mega Disasters of India and Lessons Learnt.

Disaster Management Act 2005 – Institutional and Financial Mechanism

National Policy on Disaster Management, National Guidelines and Plans on Disaster Management; Role of Government (local, state and national), Non-Government and Inter Governmental Agencies

Refugee Camps and Settlements: Water Supply and Sanitation in Emergency: *Introduction*-Human rights, international humanitarian law and refugee conventions, water and sanitation, refugee camp planning.

Settlement planning- Environmental health risks in emergencies – needs and standards – public health approach to water supply and sanitation in emergencies – partners in the humanitarian response – working with disaster affected people – social diversity – local context Emergency settlements, site selection and planning – introduction – physical planning of emergency settlement – settlement location and physical layout implications for water supply and sanitation. Water supply – planning and implementation – water sources – treatment – pumping – tinkering – storage – distribution – collection and use – testing. Waste water – storm water – community involvement.

*Waste Management-* Phased response – organizational options – staffing needs – monitoring latrine programmers – technical options – options for problem sites- Health risk of solid waste from health centers – dead bodies disposal

#### Unit- V: Applications of Science and Technology for Disaster Management

Geo-informatics in Disaster Management (RS, GIS and GPS ).

Disaster Communication System (Early Warning and Its Dissemination).

Land Use Planning and Development Regulations, Disaster Safe Designs and Constructions, Structural and Non Structural Mitigation of Disasters

S & T Institutions for Disaster Management in India

- 9. Harvey, P.A., Baghri, S. and Reed, R.A. (2002) **Emergency Sanitation: Assessment and programme design**, WEDC, Loughborough University, UK.

#### **Course outcomes:**

After completing this course, student will be:

- Acquainted with basic information on various types of disasters
- Knowing the precautions and awareness regarding various disasters
- Decide first action to be taken under various disasters
- Familiarized with organization in India which are dealing with disasters and Legal framework of disaster management
- Able to select IT tools to help in disaster management

# PROPOSED SYLLABUS FOR ENVIRONMENTAL SCIENCE & ENGINEERING

| Course Code                 | OE                                  |
|-----------------------------|-------------------------------------|
| Course Name                 | ENVIRONMENTAL SCIENCE & ENGINEERING |
| Number of Credits and L-T-P | 3 [L – 3, T – 0, P - 0]             |
| Course Category             | OE                                  |
| Prerequisites               | NA                                  |

## **Course Objectives:**

After completing this course, the students will be able

- 1. To increase the awareness towards Environmental Science and Engineering.
- 2. To recognize and apply the role of technology towards Environmental Science and Engineering.
- 3. To know the method and tools used for Environmental Science and Engineering.
- 4. To know about the environmental pollution management act.

## **Course Contents:**

| Unit No. | Description of Topic   |    |
|----------|--|----|
| 01       | 1.1 Classification of Environment 1.2 Environmental descriptors 1.3 Environmental quality and descriptive parameters 1.4 Ecology: Definition and classification 1.5 Environmental impact on ecology  | 08 |
| 02       | <ul> <li>Water pollution and pollutants (Natural and Anthropogenic)</li> <li>2.1 Ground water: Sources and quality analysis</li> <li>2.2 Surface water: Sources and quality analysis</li> <li>2.3 Quality parameters in water treatment along with flow-sheets</li> <li>2.4 Basic processes for potable water supply (Detailed technology not necessary)</li> <li>2.5 Water pollution: Surface and ground water pollution, types of pollutants</li> <li>2.6 Mode of water pollution</li> <li>2.7 Parameters to be assessed for water pollution (Turbidity, pH, total suspended solids, total solids, BOD and COD:</li> </ul> | 10 |

|  | Definition, calculation)   |    |  |
|--|--|----|--|
|  | <ul><li>2.8 Chemistry aspect for water pollution</li><li>2.9 Control of water pollution (Description only)</li><li>2.10 Fundamental of water treatment techniques.</li></ul>   |    |  |
| Air quality, Air Pollution and Control, Noise Pollution  3.1 Definition of pollution and pollutant, Natural and manmade sources of air pollution (Refrigerants, I.C., Boiler)  3.2 Air Pollutants: Types, Units of air pollutants  3.3 Atmospheric physics for air pollution  3.4 Particulate Pollutants: Effects and control strategies (Bag filter, Cyclone separator, Electrostatic Precipitator)  3.5 Advanced air pollution control methods  3.6 Noise pollution: sources of pollution, measurement of noise pollution  3.7 Noise measuring devices and their demonstration |  | 10 |  |
| 04   | <ul> <li>4.1 Definition of solid waste</li> <li>4.2 Classification of solid waste</li> <li>4.3 Overview on municipal, industrial, hazardous, hospital, plastic, E-waste.etc.</li> <li>4.4 Solid waste management and disposal process.</li> <li>4.5 Soil pollution ,Poor Fertility, Septicity, Concentration of Infecting Agents in Soil</li> <li>4.6 Leaching and its impact on soil pollution.</li> </ul>              | 06 |  |
| 05   | <ul> <li>Renewable sources of Energy</li> <li>5.1 Energy Resources: Energy scenario, national and international status.</li> <li>5.2 Solar Photovoltaics: Solar radiation and types, basic working principle of solar PV, solar cells and types, water pumping and applications of solar PV.</li> <li>5.3 Solar Thermal system: basic working principle and applications of solar thermal energy, solar water</li> </ul> | 06 |  |

| 06 | systems and its basic working.  5.7 Geothermal energy: Basic working principle, types and application of geothermal energy.  5.8 Ocean & Tidal Energy: Basic working principle, applications and types of different types of energy generation through ocean and tidal systems  Environment Legislation system and Rules |    |
|----|--|----|
| 06 | 6.1 Environmental protection rules 6.2 Sustainable environmental management  | 02 |
|    | Total Hours  | 42 |

## Weightage distribution in both objective, short and broad answer type questions:

| Group | Unit Number | Weightage (%) |
|-------|-------------|---------------|
| A     | 1 & 2       | 50            |
| В     | 3 & 4       | 30            |
| С     | 5 & 6       | 20            |

## **Course Outcomes:**

At the end of the course, the student will be able to:

| CO1 | Recognize the relevance and the concept of Environmental Science and               |  |  |
|-----|--|--|--|
| COI | Engineering and different world-wide activities on this area.                      |  |  |
| CO2 | Illuminate the different types of environmental pollutant, their effects and their |  |  |
| COZ | sustainable solutions.   |  |  |
| CO3 | Discuss the environmental regulations act. and standards                           |  |  |
| CO4 | Gather basic idea about conventional and non-conventional energy resources         |  |  |
| CO5 | Demonstrate the broad perspective of Environmental Science practices by            |  |  |
| COS | utilizing engineering knowledge and principles                                     |  |  |

Semester: VI

**Course Code: OE** 

**Course Title: Mechatronics** 

Number of Credit: 3 (L-3; T-0; P-0)

Prerequisite: Nil Course Category: OE

## **Course Objectives:**

- 1. To learn the architecture of the mechatronics system design.
- 2. To study the characteristics of the mechanical and electrical actuators and their selection for mechatronic systems.
- 3. To develop process plan and templates for design of mechatronic systems.
- 4. To know different system models and applications of mechatronic systems.

## **Course Contents (Theory):**

#### Unit: 1 **1. Introduction to Mechatronics:**

- 1.1 Introduction.
- 1.2 Advantages of Mechatronics.
- 1.3 Basic building blocks of Mechatronic systems.
- 1.4 Measurement systems of Mechatronics.
- 1.5 Control systems and their types.
- 1.6 Closed-loop control System, Multi input multi output system,
- 1.7 Measurement System terminology:
- a) Displacement, Position & Proximity Sensors.
- b) Velocity and Motion Sensors.
- c) Fluid Pressure Sensors.
- d) Force Sensors.
- e) Flow Sensors.
- f) Temperature Sensors.
- g) Liquid Level Sensors.
- h) Light Sensors.
- 1.8 Selection of Sensors and their specifications.

## Unit: 2 **2.1 Mechanical Actuation Systems**:

- 2.1.1 Types of motion.
- 2.1.2 Advantage and limitations
- 2.1.3 Loading, Gear Trains, Pawl & Ratchet, Belt & Chain drives, Bearings Selection, Ball & Roller bearings.
- 2.1.4 Mechanical aspects of motor selection.

#### **2.2 Electrical Actuation Systems**:

- 2.2.1 Switches & Relays, Solenoids.
- 2.2.2 D.C Motors, A.C. Motors.

2.2.3 Stepper Motors: Specifications and Control of stepper motors. 2.2.4 D.C Servomotor and A.C Servomotor, Specifications and Control of servo 2.2.5 AC & DC position control system. 2.2.6 A/D & D/A converter. 2.3 Pneumatic & Hydraulic Systems: 2.3.1 Power supplies. 2.3.2 Applications of Directional Control Valve (DCV). Pneumatic Control Valve, Cylinders, Rotary actuators. Unit: 3 3. Mathematical Model: 3.1 Introduction to Mathematical model. 3.2 Mechanical System building blocks. 3.3 Electrical System building blocks. 3.4 Fluid System building blocks. 3.5 Thermal System building blocks. 3.6 System Model: Engineering Systems: Rotational, Translational Systems, Electro-Mechanical System, Hydro-Mechanical System. 3.7 Input/Output Systems: 3.7.1 Interfacing system, Input/output ports, 3.7.2 Buffers, Handshaking, Polling and interrupts, Serial interfacing, Introduction to PIA, Serial communications interface, 3.7.3 Example of interfacing of a seven-segment display with a decoder. Unit: 4 4. Programmable Logic Controller (PLC): 4.1 Function of PLC in Mechatronics. 4.2 Basic block diagram and components of PLC. 4.3 Function of Input & Output module. 4.4 PLC Programming steps, Ladder diagram, logic functions, Latching and Sequencing, Timers, Internal relays and Counters, Shift registers, Master and Jump Controls. 4.5 Data handling, Analog input/output. 4.6 Selection criteria of PLC. 4.7 Applications of PI, PD, PID controller. Unit: 5 **5. Applications in Mechatronics:** 5.1 Design process stages, 5.2 Case studies of Mechatronics systems: a) A pick-and-place robot. b) Car parking. c) Automatic water level measurement. d) Sequential control of washing machine.

| e) Automatic Camera. |
|----------------------|
|                      |

## Text / Reference Books:

| Sl. No. | Titles of Book   | Name of Author              | Name of Publisher        |
|---------|--|-----------------------------|--------------------------|
| 1.      | Mechatronics   | W. Bolton                   | Pearson Education India. |
| 2.      | Mechatronics   | M.D. Singh& Joshi           | Prentice Hall of India   |
| 3.      | Mechatronics System  | Devadas Shetty              | PWS Publishing           |
| 4.      | A Text Book on Mechatronics                                | R.K.Rajput                  | S.Chand & Co, New Delhi  |
| 5.      | Exploring Programmable Logic Controllers with applications | Pradeep Kumar<br>Srivatsava | BPB Publications         |

## **Course Outcomes:**

At the end of the course, the student will be able to:

- 1. Know the architecture of the mechatronics system design.
- 2. Interpret the characteristics of the mechanical and electrical actuators and select for mechatronic systems.
- 3. Propose process plan and templates for design of mechatronic systems.
- 4. Learn use of PLC in mechatronic systems.
- 5. Know different system models of mechatronic systems and apply them for specific use.

| Semester: VI                           |
|--|
| Course Code : OE                       |
| Course Title : Internet of Things      |
| Number of Credit: 3 (L- 3; T- 0; P- 0) |
| Prerequisite: Nil                      |
| Course Category: OE                    |

## **Course Objectives:**

- To learn the concept of IOT.
   To know IOT standards for applications.
   To implement IOT in different fields of applications.

## Course Contents (Theory):

| Unit: 1  | 1. Introduction to Internet of Things:                                       |  |  |  |
|----------|--|--|--|--|
|          | 1.1 Define the term "Internet of Things"                                     |  |  |  |
|          | 1.2 Technological trends that led to evolution of IOT                        |  |  |  |
|          | 1.3 IOT in everyday life.  |  |  |  |
|          |  |  |  |  |
| Unit: 2  | 2. Design consideration of IOT:  |  |  |  |
|          | 2.1 Describe the components of an embedded system.                           |  |  |  |
|          | 2.2 Describe the interactions of embedded systems with the physical world.   |  |  |  |
|          | 2.3 Name the core hardware components most commonly used in IOT devices.     |  |  |  |
|          | 2.4 IOT and SCADA.   |  |  |  |
|          | 2.5 IOT handling Big Data.   |  |  |  |
|          |  |  |  |  |
| Unit:3   | 3. Interfacing by IOT devices:   |  |  |  |
|          | 3.1 Describe the interaction between software and hardware in an IOT device. |  |  |  |
|          | 3.2 Explain the use of networking and basic networking hardware.             |  |  |  |
|          | 3.3 Different components used for Internet.                                  |  |  |  |
|          | 3.4 Describe the structure of the Internet.                                  |  |  |  |
| Unit: 4  | 4. IOT Standards:  |  |  |  |
|          | 4.1 Requirement of international standard ( case study)                      |  |  |  |
|          | 4.2 IOT standards in practice.   |  |  |  |
|          | 4.3 Operating platforms /systems.  |  |  |  |
| Unit : 5 | 5. IOT Applications & Challenges:  |  |  |  |
| 01110.0  | 5.1 Lighting as a service (case study).                                      |  |  |  |
|          | 5.2 Intelligent Traffic systems (case study).                                |  |  |  |
|          | 5.3 Smart car Parking system (case study).                                   |  |  |  |
|          | 5.4 Smart water management (case study).                                     |  |  |  |
|          | 5.5 Challenges in IOT implementation.  |  |  |  |
|          | olo dianenges in for implementation.   |  |  |  |
|          |  |  |  |  |
|          |  |  |  |  |

## **SUGGESTED SOFTWARE/LEARNING WEBSITES:**

- 1. https://www.raspberrypi.org/blog/getting-started-with-iot/
- 2. https://www.arduino.cc/en/IoT/HomePage
- 3. https://www.microchip.com/design-centers/internet-of-things
- 4. https://learn.adafruit.com/category/internet-of-things-iot
- 5. http://esp32.net/

#### **Course Outcomes:**

At the end of the course, the student will be able to:

- 1. Learn IOT concepts and Standards of IOT.
- 2. Know components of IOT System.
- 3. Know IOT applications in different fields.
- 4. Interpret challenges in IOT implementation.

## **Proposed Syllabus of Sustainable Development**

| Course Code                 | OE6XX                   |
|-----------------------------|-------------------------|
| Course Name                 | Sustainable Development |
| Number of Credits and L-T-P | 3 [L – 3, T – 0, P - 0] |
| Course Category             | OE                      |
| Prerequisites               | NA                      |

## **Course Objectives:**

After completing this course, the students will be able

- 1. To increase the awareness towards sustainability.
- 2. To recognize and apply the role of technology towards sustainable development.
- 3. To know the method and tools used for sustainability.
- 4. To know about the environmental pollution management act.

## **Course Contents:**

| Module No. | Module No. Description of Topic   |    |
|------------|---|----|
| 01         | <ul> <li>Sustainability</li> <li>1.1 Sustainability – introduction – concept – application of this concept</li> <li>1.2 Social, Economical and environmental Sustainability (Concept only)</li> <li>1.3 Relation between Technology and Sustainable development</li> <li>1.4 Millennium Development Goals (MDGs) and Sustainable Development Goals (SDGs)- 17th goals of sustainable development by UN. (Name and concept)</li> <li>1.5 REACH (Registration, evaluation, authorization and restriction of chemicals) – Definition – Application – Aim</li> <li>1.6 Clean Development Mechanism (CDM)</li> <li>1.7 National Action Plan on Climate Change (NAPCC)</li> </ul> | 12 |
| 02         | <ul> <li>2.1. Introduction of environment- basic elements of environment,</li> <li>2.2. Environmental pollution – Type of Environment pollution (definition and concept)</li> <li>2.1. Air Pollution and its sources and effects, - reducing process</li> <li>2.2. Water pollution and its sources and effect, - reducing process</li> <li>2.3. Soil pollution – cause – effect – reducing process</li> </ul>   | 10 |

|    | 5.1. Basic concept of sustainable habitat, Methods for   |     |
|----|--|-----|
|    |  |     |
|    | Sustainability practices   |     |
|    | 4.4. Environmental aspects of renewable energy projects  |     |
|    | 4.3. Worldwide and national progress in renewable energy.  |     |
|    | energy, ocean and tidal energy   |     |
| 01 | Fuel cells, Wind energy, hydro energy, geothermal  | 00  |
| 04 | solar photovoltaic, solar thermal energy, bio-energy,  | 06  |
|    | 4.2. Working principle, advantages, disadvantages about  |     |
|    | 4.1. Basic concepts of Renewable energy sources  |     |
|    | Non-conventional resource management   |     |
|    | 3.3. Industrial ecology and industrial symbiosis.  |     |
|    | Assessment (EIA),  |     |
|    | 3.2. Circular economy, Bio-mimicking, Environment Impact   |     |
| 03 | goal of Life Cycle Analysis (LCA),   | 80  |
|    | 3.1.ISO 14001:2015 frame work and benefits, Scope and  | 0 - |
|    |  |     |
|    | Environmental pollution management   |     |
|    | protection.  |     |
|    | print, water footprint, legal provisions for environmental   |     |
|    | layer depletion, Carbon credits, carbon trading, carbon foot   |     |
|    | 2.7.Greenhouse effect, Global warming, Climate change, Ozone   |     |
|    | and 3 R concepts in solid waste management;  |     |
|    | 2.6.Solid waste and its causes and effect - Zero waste concept   |     |
|    | mechanism  |     |
|    | <ul><li>2.4.Noise pollution – causes –effect- reducing process</li><li>2.5. Radioactive Pollution- cause –effect and controlling</li></ul> |     |

## Weightage distribution in both objective, short and broad answer type questions:

| Group | Module Number | Weightage (%) |
|-------|---------------|---------------|
| Α     | 1 & 2         | 50            |
| В     | 3 & 4         | 30            |
| С     | 5             | 20            |

## **Course Outcomes:**

At the end of the course, the student will be able to:

| CO1 Recognize | the relevance and the concept of sustainability and different world- |
|---------------|--|
|---------------|--|

|  | wide activities on this direction.   |  |  |
|--|--|--|--|
| CO2  | Illuminate the different types of environmental pollutant, their effects and their |  |  |
| COZ  | sustainable solutions  |  |  |
| CO3  | Discuss the environmental regulations act. and standards                           |  |  |
| CO4  | Gather basic idea about conventional and non-conventional energy resources         |  |  |
| Demonstrate the broad perspective of sustainable practices by utiliz |  |  |  |
| COS  | engineering knowledge and principles   |  |  |

## **MEDICAL ELECTRONICS**

## (Open Elective)

<u>Credit-3</u> <u>L- 3 hrs./Week</u>

## **Objective:**

- 1. Acquire the knowledge of bio-electric potential.
- 2. To be familiar with bio-medical Instrumentation.
- 3. Introduce to the electronic devices and theory of operation in the medical area.
- 4. Apply knowledge of engineering and science to understand the principle of electronic of the Biomedical Instruments & Machineries.
- 5. Introduce the student to the electronic devices for medical imaging.

| Unit | Course content   | Cont.<br>Hrs |
|------|--|--------------|
| 1    | <b>Bio-potential:</b> Introduction to cell, Structure of cell membrane, excitable cells, definition of | 5            |
|      | Bio-potential, Membrane potential, Resting membrane potential, Cause of Resting                        |              |
|      | membrane potential, Nernst equation for Equilibrium electric potential, Goldman equation for           |              |
|      | membrane potential, Action potential, Different phenomenon of action potential, action                 |              |
|      | potential wave form, Propagation of action potential.  |              |
|      | Bio-medical signals: Non-electric bio-medical signal and introduction to bio-electric                  |              |
|      | signals& their sources. Introduction to ECG, EEG, EMG, ERG.  |              |
| 2    | Basic Concept of Bio-medical Instrumentation: Different types of bio-medical instrument,               | 4            |
|      | Generalized bio-medical instrumentation system - Basic block diagram, different functional             |              |
|      | units such as electrodes, transducer/ sensor, bio-amplifier, filter, display, recorder, alarm,         |              |
|      | controlling system, memory.  |              |
| 3    | ECG:Definition of ECG, Electro-physiology of heart, ECG amplifier, ECG electrodes and its              | 6            |
|      | placement, ECG leads, Basic block diagram of ECG machine, HR measurement,                              |              |
| 4    | Blood pressure measurement: definition of blood pressure, arterial blood pressure, Systolic            | 5            |
|      | pressure, Diastolic pressure, pulse pressure, mean pressure, Indirect BP measurement                   |              |
|      | method, Principle of Auscultatory method, Working of Electronic BP instrument, Working                 |              |
|      | principle of Direct BP measurement.  |              |
| 5    | Medical Laboratory Instrument: Introduction to photometry, Bear-Lambert's law.                         | 4            |
|      | Working, block diagram, application of Colorimeter, Clinical Bio-chemistry analyzer, Cell              |              |
|      | counter  |              |
| 6    | Cardiac Pacemaker and Defibrillator: Pacemaker& its necessity, Working principle of                    | 4            |
|      | Synchronous and Asynchronous pacemaker with block diagram, Implantable Pacemaker.                      |              |
|      | Defibrillator, Working principle of Defibrillator with block diagram. Application of                   |              |
|      | Defibrillator.   |              |
| 7    | Patient Monitoring System: Introduction to ICU, Working of bed side patient, different                 | 3            |
|      | clinical parameter, Centralized patient Monitoring system.   |              |
| 8    | <b>Electro-surgery Machine:</b> Working principle of electro-surgery machine, Cutting &                | 2            |
|      | coagulation mode, Electro-surgery circuit, electro-surgery Safety.                                     |              |
| 9    | Electrical safety: Introduction to Electric shock hazard in electro-medical Instrument, Macro          | 4            |
|      | shock, micro shock, Physiological effects of Electric Shock, Leakage current, Earth leakage            |              |
|      | current, Enclosure leakage current, Patient Leakage current, Patient safety precaution.                |              |
| 10   | Medical imaging: X-ray, Working of X-ray machine with block diagram, Computed                          | 5            |
|      | radiography (CR) system, Digital radiography (DR), Ultrasound, Working principle of                    |              |
|      | Ultrasound imaging system, Different modes of Ultrasound. Principle of CT image                        |              |
|      | formation, Principle of MRI.   |              |
| 11   | Introduction to bio-telemetry: Definition of bio-telemetry, Wireless bio-telemetry, Single             | 3            |
|      | channel bio-telemetry, Multi-channel Bio-telemetry,  |              |
|      | Total:   | 45           |

## **Course Outcome (CO)**

| CO  | After completion of the course, students would be able to  |
|-----|--|
| CO1 | Describe the bio-potential, resting membrane potential, Nernst equation, Goldman equation,       |
|     | Action potential.  |
| CO2 | Explain the working principle of ECG machine, blood pressure instrument, photometry, Clinical    |
|     | Bio-chemistry analyzer, Cell counter, Cardiac pacemaker, defibrillator, patient monitor, electro |
|     | surgery machine.   |
| CO3 | State the electrical shock hazards in medical equipment/machinery, Physiological effects of      |
|     | Electric Shock, Leakage current & its types, Patient safety precaution.                          |
| CO4 | Demonstrate working principle of Medical imaging modalities – X-ray, CR, ultrasonography,        |
|     | CT scan MRI and working principle of bio-telemetry.  |

Note: CO may be changed as per the concern subject teacher.

| Course Code       | : | OE II  |
|-------------------|---|--|
| Course Title      | : | OCCUPATIONAL HEALTH & SAFETY ENGINEERING                 |
| Course Category   | : | Open Elective II   |
| Number of Credits | : | 3  |
| Contact           | : | 3 lecture/week, 1hr/lecture, Total 45 lecture            |
| Offered to        | : | 6 <sup>th</sup> Semester students                        |
| Pre Requisite     | : | Elementary knowledge on Safety Engineering at Industries |

## **Course Objectives**

**FWT OE II OCCUPATIONAL HEALTH AND SAFETY ENGINEERING** The course aims at providing exposure to make the students

- To learn about the basics of hazard, risk and acciedents in various industries and their management;
- To learn about the principles of Industrial hyegiene their permissible limits and controlling measures;
- To learn about the various hazards in industries and the impact of damages in these areas;
- To understand the safety procedures involved in the footwear and allied industries;
- To learn about the statutory requirements mentioned in factories act for prevention of accidents.

## **Course Content**

| UNIT I  | OCCUPATIONAL HEALTH  Duration: 05 Periods (L: 5.0)  |                                   |  |
|---------|---|-----------------------------------|--|
|         | <ul> <li>History of occupational health;</li> </ul> |                                   |  |
|         | <ul> <li>Concept of occupational health;</li> </ul> |                                   |  |
|         | Occupational and work related dise                  | ases;                             |  |
|         | <ul> <li>Levels of prevention;</li> </ul>           |                                   |  |
|         | Health examination (Initial & Period                | lic);                             |  |
|         | Essentials of occupational health se                | rvices (OHS);                     |  |
|         | Personal protective equipment (PPE)                 | E-Respiratory & Non-Respiratory); |  |
|         | Ergonomic Controls;                                 |                                   |  |
|         | Risk Assessment;                                    |                                   |  |
|         | Risk Management & Risk Tolerance.                   |                                   |  |
| UNIT II | INTRODUCTION TO INDUSTRIAL SAFETY                   | Duration: 05 Periods (L: 5.0)     |  |
|         | History and development of Safety                   | movement;                         |  |
|         | Importance of safety and safety co                  | nciousness in Indian Footwear and |  |
|         | allied Industries;                                  |                                   |  |

|          | Safety policy;  |  |  |
|----------|---|--|--|
|          | <ul> <li>Safety organizations and its responsibilities;</li> </ul>                    |  |  |
|          | Industrial Accidents;   |  |  |
|          | Accidents sequence theory;  |  |  |
|          | Causes of accidents;  |  |  |
|          | Identification of vulnerable areas of accidents;                                      |  |  |
|          | <ul> <li>Accident prevention and control techniques including near misses,</li> </ul> |  |  |
|          | risk, hazards and dangerous occurances;   |  |  |
|          | First Aid;  |  |  |
|          | Financial Cost – Direct & Indirect cost of accidents.                                 |  |  |
| UNIT III | INDUSTRIAL HYEGIENE Duration: 05 Periods (L: 5.0)                                     |  |  |
|          | <ul> <li>Principles and its control measures;</li> </ul>                              |  |  |
|          | Permissible limits;   |  |  |
|          | • Stress;   |  |  |
|          | Exposure to Heat;   |  |  |
|          | Heat balance;   |  |  |
|          | Effects of heat stress;   |  |  |
|          | Chemical agents;  |  |  |
|          | Flammables;   |  |  |
|          | Explosives – Types, Water Sensitive chemicals, Oxidants, Gases under                  |  |  |
|          | pressure;   |  |  |
|          | • Chemicals causing Health Hazards – Irritants, Asphyxiates,                          |  |  |
|          | Anaesthetics, Poisons and Carcinogens.  |  |  |
|          | Air Sampling.   |  |  |
|          | Types of Air Borne contaminants and their evaluation methods.                         |  |  |
|          | House keeping and its importance.   |  |  |
| UNIT IV  | WORKPLACE HAZARDS AND ITS CONTROL Duration: 10 Periods (L:10.0)                       |  |  |
|          | Physical Hazards  |  |  |
|          | Illumination - Principles and Purpose of good illumination,                           |  |  |
|          | Standards of Illumination;  |  |  |
|          | Ventilation – Principle and Purpose of ventilation,                                   |  |  |
|          | Classification of ventlation (Natural & Artificial);                                  |  |  |
|          | ➤ Thermal Stress – Various indexes, its impact & control                              |  |  |
|          | (including air conditioning);   |  |  |

- Impact & Control of Vibration;
- Noise Pollution, its impact and control;
- Imoact & control of radiation;
- Personal Protective Aids;
- Safe weight lifting procedure;
- Safe Start Up;
- Shut down and emergency shut down procedures;
- Permit to work system.

#### • Chemical Hazards

- Definition of various chemical hazards, properties and preventive measures;
- Routes of entry of chemicals into human body;
- Concentration & type of exposure in the industry;
- > General toxic effects of chemicals for the environment;
- Common safety in transportation and bulk storage of hazadous materials;
- Corrosion prevension and preventive maintainance of vulnerable equipment;
- Safe entry into confined spaces;
- Permit to work system;

## Electrical Hazards

- Dangers from electricity;
- Safe limits of voltage and amperage;
- Safe distance from LT and HT Lines;
- Means of cutting of Power overload and short circuit protection;
- Methods and importance of Earthing, earth fault protection, earth insulation and continuity tests;
- Control of hazards due to Static electricity permit to work system.

## Fire Hazards

- Chemistry of fire;
- Classification of fire;
- Common causes of industrial fire statutory;

|         | Provisions regarding fire safety;   |             |  |  |
|---------|---|-------------|--|--|

|         | Leather Section;  |             |  |  |
|         | Assembly Section;   |             |  |  |
|         |   |             |  |  |
|         | <ul><li>Engineering;</li><li>Packing and handling of finished products;</li></ul> |             |  |  |

- ➤ HR Administration and Accounts;
- Stores & Purchases;
- Projects;
- > Environment, Health, Safety & Fire.
- Effective steps to implement safety procedures of the associated hazard and its effect;
- Periodic inspection and preventive maintainance of Footwear machines & equipments.

## UNIT VII SAFETY MANAGEMENT IN FOOTWEAR INDUSTRY

Duration: 05 Periods (L: 5.0)

- Principles of safety management;
- Safety policy;
- Benefits of zero incident safety policy;
- Importance of incident free working environment;
- Incident investigation;
- Root cause analysis;
- Medical evaluation;
- Preventive action;
- Safety awareness programme at workplace;
  - Motivation;
  - Education;
  - > Training at various levels of production & operation.
  - Appraisal of Industrial Safety;
  - Measurement of Safety performance;
- Machineries safety;
- Standard operating procedures (SOP) of modern equipment's;
- Personal protection equipment's (PPE);
- PPE Compliance;
- Emergency drill for worker;
- Effective communication;
- Safety Standards;
- Role of Government, Management & Trade Unions in promoting industrial safety;
- Safety Organisation Role of safety Committee and its formation.

#### **UNIT VIII**

#### **INDUSTRIAL SAFETY REGULATIONS**

- The Factory Rules;
- Functions of Safety Management;
- Legislative Measures in Industrial Safety: Factory Act 1948, Workmen's Compensation Act 1943, Employees Sattate Insurance Act 1948; Water (Prevention & Control) Pollution Act 1974, Boiler Vessels Act, Child Labour and Women Employee Act;

Duration: 05 Periods (L: 5.0)

- ILO Convention and Recommendations in the furtherance of Safety,
   Health & Welfare;
- Occupational Safety;
- Health & Environment Mangement: Bereau of Indian Standards on Safety Health 14489 – 1998 and 15001 – 2000 OSHA (Occupational Safety and Health Administration).

## **Suggested Students Assignment (Any One)**

Each student should do any one of the following assignment or any other similar assignment related to the course and before conducting, gets it approved from concerned Teachers and HOD.

- Draw an emergency response action plan case of fire broke out at Footwear industry.
- ➤ Briefly describe Factories Act, 1948 and Employees State Insurance Act, 1948.
- ➤ Briefly describe about the various types of hazardous risks associated with footwear industry and therby suggest the possible remedial measures.

#### **Expert Lecture**

It is mandatory to organize an **Expert Lecture** on the aforesaid subject by inviting resource persons from the domain specific i.e Footwear Industry.

#### **Evaluation Scheme**

# THEORY (100 MARKS)

| External Assessment<br>(60 Marks) | Internal Assessment<br>(40 Marks) |                                      |                     |
|-----------------------------------|-----------------------------------|--------------------------------------|---------------------|
| End Semester Examination          | Mid Semester<br>Test              | Quizzes/<br>Viva voce/<br>Assignment | Class<br>Attendance |
| 60                                | 20                                | 10                                   | 10                  |

**Pass Criterion:** Students have to obtain at least **40% marks (Pass marks)** in both Internal Assessment and External Assessment separately.

## **References/Suggested Learning Resources**

- 1. Industrial Safety Handbook (2<sup>nd</sup> Edition) by William Handley-McGraw Hill Book Company, 1969.

## **Course Outcomes**

| course outcomes |  |  |  |
|-----------------|--|--|--|
| At the success  | At the successful completion of this course, students will be able to                |  |  |
| CO I            | Identify the components needed to provide a safe and healthiful work environment     |  |  |
|                 | through case studies and review of injury statistics provided in the course.         |  |  |
| CO II           | Analyze safety and health issues resulting from worker complaints or OSHA violations |  |  |
|                 | and suggest potential remedies.  |  |  |
| CO III          | Identify potential workplace safety and health hazards and determine how to mitigate |  |  |
|                 | the hazards through engineering controle, administrative controls and personal       |  |  |
|                 | protective equipment.  |  |  |
| CO IV           | Conduct basic safety inspections using strategies that they have developed through   |  |  |
|                 | hazard identification and job hazard analysis.                                       |  |  |
| CO V            | Review the principles for developing and implementing a successful occupational      |  |  |
|                 | health and safety program and evaluation of a work site.                             |  |  |

|                   |   | Pollutants   |

## **Course Objectives**

**FWTOE II INDUSTRIAL HAZARDS AND MODERN WASTE MANAGEMENT** The course aims at providing exposure to the students

- To learn about the sources, categories, composition and general methods of disposal and management of solid waste;
- To provide comprehensive overview of solid and hazardous waste management;
- To provide knowledge on solid waste management design aspects;
- To learn about the different methods of solid waste management.

#### **Course Content**

| UNIT I   | WASTE GENERATION & DISPOSAL                          | Duration: 08 Periods (L: 8.0) |
|----------|--|-------------------------------|
|          | • Introduction;                                      |                               |
|          | <ul> <li>Sources and Categories of waste;</li> </ul> |                               |
|          | Bio Degradable and Non Bio Degra                     | adable waste;                 |
|          | Solid wastes and their classificatio                 | n;                            |
|          | Chemical composition of solid was                    | etes;                         |
|          | General methods of Disposal and I                    | Management of Solid waste;    |
| UNIT II  | INDUSTRIAL WASTE                                     | Duration: 08 Periods (L:8.0   |
|          | <ul> <li>Introduction;</li> </ul>                    |                               |
|          | Types of Industrial waste;                           |                               |
|          | Identification of Industrial waste;                  |                               |
|          | Hazardous waste management site                      | es in India;                  |
|          | Route of industrial hazard entry in                  | to human body-Inhalation;     |
| UNIT III | SOLID WASTE GENERATION IN FOOTWEAR AND LEA           | THER PRODUCTS INDUSTRY        |
|          |  | Duration: 08 Periods (L: 8.0) |
|          | • Introduction;                                      |                               |
|          | Generation   |                               |
|          |  |                               |
|          | Leather cut-off;                                     |                               |

|         | Reaction Injection Moulded (RIM);  |
|---------|--|
|         | <ul><li>Polyurethane (PU) blends;</li></ul>                                    |
|         | Poly Vinyl Chloride (PVC) and blends;  |
|         | Ethyl Vinyl Acetate (EVA) and blends;  |
|         | Styrene butadiene rubber (SBR) wastes;   |
|         | Thermoplastic Polyurethane (PU) waste;   |
|         | Thermoplastic Rubber (TR);   |
|         | Textiles;  |
|         | Cotton excess;   |
|         | Polyester;   |
|         | Nylon;   |
|         | Materials used in Assembling Operations: Adhesive, Solvent, Finishing          |
|         | materials etc.   |
| UNIT IV | SOLID WASTE GENERATION IN LEATHER INDUSTRY                                     |
|         | Duration: 08 Periods (L: 8.0)  |
|         | Introduction;  |
|         | Generation   |
|         | Skin Collagen waste;   |
|         | Fleshing waste;  |
|         | ➤ Wet Blue;  |
|         | Trimming;  |
|         | Buffing;   |
|         | Chrome shaving;  |
|         | Chrome Split;  |
|         | Trimming from crust and finished leather;                                      |
|         | <ul> <li>Description on possible utilization of the leather wastes.</li> </ul> |
| UNIT V  | SOLID WASTE MANAGEMENT OF FOOTWEAR INDUSTRIES.                                 |
|         | Duration: 06 Periods (L: 6.0)  |
|         | A. STORAGE, COLLECTION AND TRANSPORTATION OF FOOTWEAR INDUSTRY WASTE           |
|         | Callantian   |
|         | Collection;     Engineering electrication:                                     |
|         | Engineering classification;     Characterization:                              |
|         | <ul><li>Characterization;</li><li>Generation and Quantification.</li></ul>     |
|         | Generation and Quantification.     Transportation                              |
|         | - Hansportation  |

- Collection systems;
- Collection equipments;
- Transfer stations;
- Collection route optimization;

#### **B. TREATMENT METHODS**

- Various methods of refuse processing;
- Recovery, Recycle & Reuse;

## Composting

- Concept, Principles and Factors affecting the composting process;
- Methods of composting Aerobic and Anaerobic, Incineration,
   Pyrolysis, Energy recovery, Bangalore and Indore model etc.

## • Disposal methods

- Impact of Open dumping;
- Site Selection;
- Sanitary land filling Design criteria and design examples;
- Leachate and Gas collection systems;
- Leachate treatment.

## Hazardous & Non-Hazardous Waste Management

- > Introduction;
- Sources;
- Classification;
- Physico-chemical, Chemical and Biological treatment;
- Regulations;
- Procedure for the management of hazardous and other industrial waste;
- Procedure for the management of Non-Hazardous Industrial waste.

## • Thermal Treatment

- Incineration and Pyrolysis;
- Soil contamination and site remediation Bioremediation processes, monitoring of disposal sites.

## UNIT VI ADVANCED WASTE MANAGEMENT METHOD

A. Removal of Refractory Organic Compounds

Duration: 07 Periods (L: 7.0)

- Advanced Oxidation Process
  - Photocatalytic treatment;
  - Membrene seperation;
  - Homogeneous catalysis system;
  - Heterocatalytic systems;

#### B. Removal of Inorganic Compounds

- Electro dialysis;
- Reverse Osmosis;
- Multiple effect evaporator;
- Ion-exchange;

#### **Suggested Students Assignment**

Each student should do any one of the following assignment or any other similar assignment related to the course and before conducting, gets it approved from concerned Teachers and HOD.

- Write a short essay on possible utilization of Waste generated from Leather Industry.
- ➤ Briefly describe about the various types of solid waste generated from a footwear manufacturing industry.
- ➤ Describe in brief about the various solid waste management techniques associated with hazardous and non-hazardous industry wastes.

#### **Evaluation Scheme**

## THEORY (100 MARKS)

| External Assessment<br>(60 Marks) | Internal Assessment<br>(40 Marks) |                                      | nt                  |
|-----------------------------------|-----------------------------------|--------------------------------------|---------------------|
| End Semester Examination          | Mid Semester<br>Test              | Quizzes/<br>Viva voce/<br>Assignment | Class<br>Attendance |
| 60                                | 20                                | 10                                   | 10                  |

**Pass Criterion:** Students have to obtain at least **40% marks (Pass marks)** in both Internal Assessment and External Assessment separately.

# **Prerequisite:**

**Aim:** The aim of the course is to acquaint the students with the export-import procedures, documentation and logistics and to familiarize students with the role of merchandiser in exports and buying Industry.

# **Course Objective:**

- 1) To explain the meaning & nature of imports & exports;
- 2) To know the facets of foreign trade policy;
- 3) To develop a conceptual understanding of the regulatory framework for exports in India;
- 4) To highlight the main characteristics of the global trade environment;
- 5) To provide an exposure regarding export –import management and documentation procedures.

# **Course Content:**

| Content (Th | Content (Theory)   |          | Hrs./Unit |
|-------------|--|----------|-----------|
| Unit:1      | Introduction to Export & Import: Export: Meaning & Importance Import: Meaning & Importance Export Vs. Import Basic Planning for Export & Import Registration for Exporters Registration for Importers Export License Import License General provisions regarding Export & Import | Module-1 | 13        |
| Unit:2      | Regulatory Framework Governing Exports and   |          |           |

# **Imports:**

# Laws governing India's export-import (general provisions):

- Foreign trade (Development and Regulation) Act, 1992
- Foreign trade (Development and Regulation) Amendment Bill, 2010
- The Customs Act
- GST Act

# Government/Semi-government agencies in export-import promotion:

- Ministry of Commerce and Industry
- Director General of Foreign Trade(DGFT)
- Export Promotion Council (EPC)
- Export Inspection Council (EIC)
- Export Credit Guarantee Corporation (ECGC)
- Directorate General of Commercial Intelligence and Statistics ((DGCI&S))
- EXIM Bank
- State Trading Corporation of India Ltd.(STC)
- Central Board of Indirect Taxes & Customs (CBIC)

# Overview of Foreign Trade Policy (2015-2020)

- Legal basis and duration of FTP
- Handbook of Procedures (HBP)
- e-IEC & e-BRC
- Reduction in mandatory documents required for Export and Import
- Electronic Data Interchange (EDI)
- Self-Assessment of Customs Duty
- Time Release Study (TRS)
- Towns of Export Excellence (TEE)
- Special provision for import of Hides Skins and semi-finished goods
- Free Exports
- Bonded Warehouses for imports & exports
- Import & Export of Samples
- Export Promotion Councils (EPC)
- Merchandise Exports from India Scheme (MEIS)
- Service Exports from India Scheme (SEIS)

| Unit:3 | <b>Export Documentation:</b>  |          |    |
|--------|---|----------|----|
|        | Export Documentation in India:  | Module-2 |    |
|        | <ul> <li>Aligned Documentation System (ADS)         <ul> <li>Meaning &amp; Advantages</li> </ul> </li> <li>Paper Size and Specifications</li> <li>Export documents: Commercial documents &amp; Regulatory documents</li> <li>Classification of Commercial and Regulatory Documents:</li> <li>Documents related to goods: Proforma Invoice, Commercial Invoice, Consular Invoice, Legalized Invoice, Customs Invoice, Packing Note and Packing List, Certificate of Origin</li> </ul>  |          | 13 |
|        | Documents related to shipment: Shipping<br>Bill, Mate's Receipt, Cart Ticket, Certificate of<br>Measurement, Bill of Lading, Airway Bill,<br>Marine Insurance Policy Certificate, Shipping<br>advice  |          |    |
|        | <b>Documents related to payment:</b> L/C, Bill of Exchange, Trust Receipt, Bank Certificate of Payment  |          |    |
|        | <b>Documents related to inspection</b> : Certificate of Inspection  |          |    |
|        | <b>Documents related to excisable goods</b> : GP Forms (GP-I/GP-II),Form C, ARE-1 Form  |          |    |
|        | Documents related to foreign exchange regulations:  |          |    |
|        | GR/SDF Form, PP Form, VP/COD Form, SOFTEX Form  |          |    |
| Unit:4 | Export procedure:   |          |    |
|        | <ul> <li>Preliminary Stage:         <ul> <li>Export Licensing, Inquiry and Offer,</li> <li>Examination of Terms &amp; Conditions of</li> <li>Export, Export Contract and</li> <li>Confirmation of Acceptance</li> </ul> </li> <li>Pre-shipment Stage:         <ul> <li>Pre-shipment Finance, Production and</li> <li>Procurement of Goods, Shipping Space,</li> <li>Packing and Marking, Quality Control and Pre-Shipment Inspection, Central Excise Clearance,</li> <li>Appointment of Clearing and</li> </ul> </li> </ul> |          |    |

|        | Forwarding agents, Insurance Cover (ECGC & Marine Policy)  • Shipment Stage: Documentary Examination at Customs House, Obtaining 'Carting Order' and Customs Physical Examination, Loading cargo on Vessel, Exchange Control Formalities  • Post-shipment Stage: Presentation of Documents to the Bank, Export Incentives  • How to export raw hides, skins and leather?  Export clearance formalities to export articles of leather, saddler, harness, travel goods, handbags  |          |    |
|--------|---|----------|----|
| Unit-5 | <ul> <li>Import Procedure &amp; Documentation:</li> <li>Import Procedure:         <ul> <li>Obtaining Import Export Code (IEC)</li> <li>Ensuring legal compliance under different trade laws</li> <li>Procuring import licenses</li> <li>Filing Bill of Entry &amp; documents to conclude the customs clearance formalities</li> <li>Determining the import duties to clear goods</li> <li>Receiving permission to import goods</li> </ul> </li> <li>Import Documentation:         <ul> <li>IEC Number, Import License , Bill of Entry, Commercial Invoice Commercial invoice cum packing list, Bill of Lading or Airway Bill, , Certificate of Insurance, Purchase Order or Letter of Credit (L/C), Technical Write-up or Literature (Only required for specific goods), Industrial License (for specific goods), Test Report (If any), Registration cum Membership Certificate (RCMC), GATT/DGFT declaration, DEEC/DEPB/ECGC License for duty benefits</li> </ul> </li></ul> | Module-3 | 13 |
| Unit-6 | INCO Terms & different Methods of Payments in International Trade: INCO Terms: EXW, FCA, CPT, CIP, DAP, DPU, DDP, FAS, FOB, CFR, CIF Methods of Payments: Advance Payment, Letter of credit, Documents against Payments - D.A.P or D/P basis, Documents against Acceptance (D/A)  |          |    |

TOTAL 60

**Pass Criterion:** Students have to obtain at least **40% marks** individually both in Internal assessment and end semester exams to pass.

#### **References:**

- 1. Export Marketing- TAS Balagopal, Himalaya Publishing House, Mumbai
- 2. Export Management- D.C. Kapoor, Vikas Publishing House, New Delhi.
- 3. Handbook of Import-Export Procedures Ministry of Commerce, Govt. of India.
- 4. Export Documentation and procedures Nabhi Publications, New Delhi.
- 5. Import Do it Yourself, M.I. Mahajan, Snow White Publications, New Delhi.

#### **Course outcomes:**

Upon completion of this course, students should be able to:

- 1) Identify and evaluate export or import opportunities in Leather Goods Sector.
- 2) Discuss the insights of procedure to set up an international trading company.
- 3) Understand the meaning, eligibility and procedure to get IEC Number for export-import business in India.
- 4) Understand documents involved in export-import activities & custom procedures for export & import in India.
- 5) Simulate an export / import order and create a detailed process involving all documentation and procedural aspects.

# **Prerequisite:**

### Aim:

# **Course Objective:**

- 1. Introduce students about the role of managements
- 2. To understand organizational behavior
- 3. To understand the role of HRM, Industrial Management
- 4. To understand the various basic concepts of Hazard, Risk, and Accidents in various industries and their management.
- 5. To understand the various effects of physical hazards on human health and the various control measures to rectify the same.
- 6. To understand and identify various hazards in industries and the impact of damages in these areas.
- 7. To understand the various fire prevention techniques to be followed in leather industries.
- 8. To evaluate workplace to determine the existence of occupational safety and health hazards.
- 9. To explain important legislations related to Health, Safety and Environment

# **Course Content:**

| Ul                     | NIT   | Topics & Sub-topics  | Module | Teaching<br>Hour |
|------------------------|---|--|--------|------------------|
| <b>\(\rightarrow\)</b> | Unit:1<br>INTRODUCTION<br>TO<br>MANAGEMENT<br>SCIENCE | Principles and function of Management-Contribution of different Management Writers(Henry Fayol, F.W. Taylor, Max Weber) in the field of Management Science.  > ORGANISATIONAL BEHAVIOR | Module | 6                |

|   | <ul> <li>Behavior-Motivation-Motivational<br/>Theories-Morale-Leadership-<br/>Communication.</li> </ul>  | 1 |    |
|---|--|---|----|
| > Unit: 2HUMAN RESOURCE MANAGE MENT                             | O Human Resource Management- Concept and Definition- Function-Recruitment-Training, Performance Appraisal- Industrial Safety.  INTRODUCTION TO INDUSTRIAL ENGINEERING (Basic Idea), PRINCIPLES OF SHOPFLOOR SUPERVISION WITH EMPHASIS ON 5S, SAFETY AND MOTIVATION.  |   | 10 |
| UNIT 3 INTRODUCTION TO INDUSTRIAL SAFETY and INDUSTRIAL HYGIENE | History and Development of Safety Movement, Importance of Safety, Safety Policy: Safety Organization and Its Responsibilities, Accident Sequence Theory, Causes of Accidents, Accident Prevention and Control Techniques Including Near Misses. Risk, Hazards and Dangerous Occurrences. First Aid. Financial Costs-Direct And Indirect Costs of Accidents.  Industrial Hygiene – Principles and its Control Measures. Permissible Limits. Stress, Exposures to Heat, Heat Balance, Effects of Heat Stress, Chemical Agents, Flammables, Explosives - Types, Water Sensitive Chemicals, Oxidants, Gases Under Pressure, Chemicals Causing Health Hazards: Irritants, |   | 6  |
| UNIT 4 WORKPLACE HAZARDS AND ITS CONTROL                        | Physical Hazards  Illumination - Principles and Purpose of Good Illumination. Standards of Illumination.  Ventilation - Principle and Purpose of Ventilation Classification of Ventilation (Natural and Artificial), Heat Stress - Various Indexes, Different Controls (Including Air Conditioning), Vibration and its Control, Noise Pollution and its Control, Noise Mapping, Personal Protective Aids. Safe Weight Lifting Procedure. Safe Start Up, Shut Down and Emergency Shut Down Procedures. Permit to Work System.   |   | 10 |

#### **Chemical Hazards**

Hazardous Chemicals – Classification and its Properties, Common Hazard and Precautions for Each Class. Safety in Transportation and Bulk Storage of Hazardous Materials. Corrosion Prevention and Preventive Maintenance of Vulnerable Equipment. Safe Entry Into Confined Spaces. Permit to Work System.

#### **Electrical Hazards**

Dangers from Electricity. Safe Limits of Voltage and Amperage. Safe Distance from LT and HT Lines. Means of Cutting of Power Overload and Short Circuit Protection. Methods and Importance of Earthing. Earth Fault Protection. Earth Insulation and Continuity Tests. Protection Against Overvoltage.

Lighting Arrester, Flame Proof and Intrinsic Electrical Equipment, Precautions in Their Selection, Installation, Maintenance and Use. Control of Hazards due to Static Electricity. Permit to Work System.

#### Fire Hazards

Chemistry of Fire, Classification of Fire. Common Causes of Industrial Fire. Statutory Provisions Regarding Fire Safety, Factors Contributing Towards Fire.

Determination of Fire Load. Fire Resistance of Building Materials. Design of Industrial Plant for Fire Safety. Prevention of Fire: Portable Extinguishers- Water Type Extinguisher, Carbon dioxide TypeExtinguisher, Foam Type Extinguisher, Dry Chemical Type Extinguisher. Sprinkle Systems, CO<sub>2</sub> Flooding System FoamFlooding System. Industrial Fire Detection and Alarms. Special Precautionary Measures Handling/Processing Flammable Liquids, Gases, Vapours, Mists and

|   | Dusts. Emergency Action Plan.   |    |  |
|---|---|----|--|
| UNIT 5 OCCUPATIONAL HEALTH  | History of Occupational Health, Concept of Occupational Health, Occupational and Work Related Diseases, Levels of Prevention, Health Examination (Initial and Periodic), Essentials of Occupational Health Services (OHS), Personal Protective Equipment (Respiratory and Non-Respiratory), Ergonomic Controls, Risk Assessment, Risk Management and Risk Tolerance.  | 5  |  |
| UNIT 6 INDUSTRIAL SAFETY LEGISLATIONS                             | The Factories Rules, Functions of Safety Management, Legislative Measures in Industrial Safety: Factories Act, 1948, Workmen's Compensation Act, 1943, Employees State Insurance Act, 1948. Water (Prevention and Control) Pollution Act, 1974, Boiler Vessels Act. Child Labour and Women Employee Act.  ILO Convention and Recommendations in the Furtherance of Safety, Health and Welfare.  Occupational Safety, Health and Environment Management: Bureau of Indian Standards on Safety and Health 14489 - 1998 and 15001 – 2000 OSHA (Occupational Safety and Health Administration). | 5  |  |
| Suggested Home<br>Assignments/Students'<br>Activities: (any Five) | i. What do you understand by safety, risks and hazards? Differentiate between risks and hazards.  ii. What are the various causes of dangerous occurrences arising due to dust, fire and chemicals refereeing different types of industries?  iii. Can you measure some control measures to limit the degree of hazards for factories highlighting the "permissible limits" of different pollutants?  | 42 |  |

| iv. | Draw schematic diagram of any fixed  |
|-----|--------------------------------------|
|     | firefighting system (sprinkler/CO2   |
|     | total flooding/foam flooding system) |
|     | and describe it.                     |

- v. Draw the labelled schematic diagram of portable fire extinguishers (showing all internal components) of DCP type, water type, CO2 type and foam type.
- vi. Classify hazardous chemical and describe the hazards associated with
- vii. Draw a labelled diagram of lighting arrester fitted on a multi-storied building and describe its functional procedure.
- viii.Briefly describe Factories Act, 1948 and Employees State Insurance Act, 1948.

# **Examination Scheme of ESE (End Semester Examination)**

| Theoretical | Question Type  | Question to be set                            | Questions<br>to be<br>answered | Marks |
|-------------|--|---|--------------------------------|-------|
|             | MCQ-type questions are carrying one mark.                | 15  | 10                             | 10    |
|             | Short answer-<br>type questions<br>carrying one<br>mark. | 15  | 10                             | 10    |
|             | Subjective-type questions carrying two marks.            | 10  | 6                              | 12    |
|             | Subjective-type questions carrying six marks.            | 9<br>(3 each<br>from each<br>of 3<br>modules) | 3                              | 18    |
|             | TOTAL  |   |                                | 60    |

Pass Criterion: Students have to obtain at least 40% marks individually both in Internal assessment and end semester exams to pass.

#### Course outcomes:

at the end of this course, a student should be able to

- 1. Understand the role of managements in industry
- 2. Understand the importance of organizational behavior
- 3. Understand the role of HRM, Industrial Management
- 4. Understand the various basic concepts of Hazard, Risk, and Accidents in various industries and their management.
- 5. Understand the various effects of physical hazards on human health and the various control measures to rectify the same.
- 6. Understand and identify various hazards in industries and the impact of damages in these areas.
- 7. Understand the various fire prevention techniques to be followed in leather industries.
- 8. Evaluate workplace to determine the existence of occupational safety and health hazards.
- 9. Explain important legislations related to Health, Safety and Environment

Besides the above this course would equip the students to effectively employ hazard analysis techniques in Industry and helpful to prevent the accidents in Industry.

|  | Class Attendance          | 10    |     |  |
| Credit: 3  | Total Marks 100           |       | 100 |  |

Pass Criterion: Students have to obtain at least 40% marks (pass marks) in both internal assessment and end semester examination separately.

# 1. Course Outcomes (COs):

CO1: Identify suitable transformer & DC motors for an intended application.

**CO2**: Analyse the input and output characteristics curves of a motor to determine its aptness for an application.

CO3: Recommend suitable fractional kW motor for a planned project.

CO4: Obtain an accurate yet compact mathematical model of a dynamical systems.

**CO5:** Determine a suitable control algorithm for an intended application.

# 2. Theory Components:

The following topics / subtopics should be taught and assessed in order to develop unit outcomes for achieving the identified course outcome.

| Unit (s)                                   |     | Topics and Sub – topics   |    |  |
|--|-----|---|----|--|
|  | 1.1 | Mechanism of Electro – Mechanical Energy Conversion   |    |  |
| Unit – 01<br>DC Machines &<br>Transformers | 1.2 | Basics of DC Machines:  Identify the different parts with functions  Working / Operating principles of Motor & Generator  Types of DC Machines  General circuit diagram / representation of DC Motor  Applications of different types of DC Motors in industrial sector | 11 |  |

|             | 1.3   | Brief concept of DC Motors:  Back - EMF - concept and necessity for starting  DC starter - necessity and types (only names)  Speed & Torque equation. (only expression)  Numerical on torque - speed equation  |    |
|-------------|-------|--|----|
|             | 1.4   | Basic concept of Transformers:     Identify main constructional parts with their functions     Types of transformers     Operating principle of Transformer     EMF equation and Transformation Ratio (expressions only)     Simple numerical on EMF equation & Transformation ratio |    |
|             | 1.5   | Various losses in transformer, OC and SC Test of transformer for finding the parameters.   |    |
|             | 1.6   | Basic concept of Auto – transformer:  • Working concept  • Volt – Ampere relationship  • Application in industrial sector  |    |
|             |       | A: Induction Motor   |    |
|             | 2.A.1 | Basics of Induction Motor:  • Identify the constructional parts with their functions  • Outline the constructional differences between SQIM & Wound rotor  |    |
|             | 2.A.2 | Terminology and expressions related to Induction Motor:  Synchronous Speed & Rotor Speed Slip Stator & Rotor frequency   |    |
|             | 2.A.3 | Working principle of an Induction Motor. (Brief idea)  |    |
| Unit – 02   | 2.A.4 | Expression of Torque developed in an Induction Motor. (only equation) Simple numerical on torque equation.   | 11 |
| AC Machines | 2.A.5 | Characteristics of Induction Motor:  • Speed – Torque Characteristics  • Slip – Torque Characteristics   |    |
|             | 2.A.6 | Control of Induction Motor:  Reversal of rotation  Voltage & frequency control method (comprehensive)  Stator & Rotor resistance control method (brief idea)  Pole changing control method (brief idea)  |    |
|             | 2.A.7 | Concept of different types of Braking method of Induction Motor.   |    |
|             | 2.A.8 | Industrial applications of Squirrel Cage & Wound - Rotor type Induction Motors.  |    |

|                                      |       | B: Synchronous Machines   |    |
|--------------------------------------|-------|---|----|
|                                      | 2.B.1 | Basics of Synchronous Machines:  Identify main constructional parts with their functions Operating principle of Synchronous Motor   |    |
|                                      | 2.B.2 | Terminology related to Synchronous Motor:   |    |
|                                      | 2.B.3 | Applications of Synchronous Motor.  |    |
|                                      | 3.1   | Basics of Permanent Magnet Synchronous Motor (PMSM)  Identify different constructional parts  Describe operating principle  Control of PMSM  Applications   |    |
| Unit – 03<br>Fractional kW<br>Motors | 3.2   | Basics of Brushless DC Motor (BLDC)  • Define the constructional parts • Describe operating principle • Closed loop Control of BLDC • Applications  | 07 |
|                                      | 3.3   | Brief concept and applications:   |    |
|                                      | 4.1   | Introduction to control system, Classification of control system.   |    |
|                                      | 4.2   | Control system components: Synchro, D.C Servomotor, AC Servo motor, AC Tachometer (only basic operating principle & construction and diagram. (no deduction)  |    |
| Unit – 04                            | 4.3   | Concept of transfer function, poles and zeroes, transfer function of first & second order system. (no deduction)  |    |
| Introduction to Control              | 4.4   | Signals (Unit step, unit ramp, unit impulse) and their mathematical representation and characteristics.   | 09 |
| System                               | 4.5   | Modelling of mechanical systems, force-voltage and force-current analogy.   |    |
|                                      | 4.6   | Block Diagram Representation of control system, Transfer function from Block diagram reduction technique, State space representation of continuous time systems, State equations, Transfer function from State Variable representation. |    |
| Unit – 05                            | 5.1   | Time response characteristics of first and second order system to unit step excitation (no deduction).  | 07 |

| Time response analysis, Stability and                       | nalysis, concept, Routh Hurwitz criteria (Numerical), Applications and limitations |  |    |
|---|--|--|----|
| Process<br>control  | 5.3  | Control action of a system with ON/OFF, P, PI, PD, PID controller, Practical application of these controllers (with block diagram only). |    |
| Total Lecture Classes (Sub Total):                          |  |  |    |
| No. of classes required for conducting Internal Assessment: |  |  |    |
|   |  | Grand Total :  | 51 |

#### 3. Suggested Home Assignments/ Student Activities:

- i) Visit a small motor manufacturing industry and make a report based on their observation.
- ii) Prepare a Power Point Presentation on the working of DC Motors, Induction Motors, Transformers, Synchronous Motor, PMSM and BLDC.
- iii) Prepare a Power Point Presentation on the parts of DC Motors, Induction Motors, Transformers, Synchronous Motor, PMSM and BLDC.
- iv) Make a market survey and submit a report on the basis of the following:
  - a. Types of Machines
  - b. Manufacturer
  - c. Name Plate details
  - d. Applications
- v) Visit a Transformer manufacturing factory and observe the various routine tests on Transformers and submit a report.
- vi) Make a model or simulation type project using BLDC and PMSM.
- vii) Deduce mathematical modeling of different mechanical and electrical systems.
- viii) Make a power point presentation on block diagram reduction technique.
- ix) Make a power point presentation on different controllers.
- x) Prepare a power point presentation on Programmable Logic Controllers.

#### 4. Suggested Scheme for Question Paper Design for Conducting Internal Assessment: (Duration: 45 Minutes)

| Questions to be set as per Bloom's Taxonomy |                              |                         |                             |       |
|---|------------------------------|-------------------------|-----------------------------|-------|
| Internal<br>Assessment                      | Distribution of Theory Marks |                         |                             |       |
|   | Level 1<br>(Remember)        | Level 2<br>(Understand) | Level 3<br>( Apply & above) | Total |
| Class Test – 1                              | 4                            | 4                       | 12                          | 20    |
| Class Test - 2                              | 4                            | 4                       | 12                          | 20    |

#### 5. Suggested Scheme for End Semester Examination :( Duration: 2 hrs. 30 mins.)

|          | A: Multiple Choice Type Questions (Carrying 1 mark each) |           |                |              |  |
|----------|--|-----------|----------------|--------------|--|
| Group    | Unit   | To be set | To be Answered | Total Marks  |  |
|          | 01 & 02  | 07        | 10             |              |  |
| A (01)   | 03   | 03        |                | 10 X 01 = 10 |  |
|          | 04 & 05  | 05        |                |              |  |
| (Questio | n Number : 01) – Total:                                  | 15        | 10             | 10           |  |

| B: Fill-in the Blank Type Questions (Carrying 1 mark each) |  |           |                |              |  |
|--|--|-----------|----------------|--------------|--|
| Group  | Unit   | To be set | To be Answered | Total Marks  |  |
|  | 01 & 02  | 07        |                |              |  |
| A (02)   | 03   | 03        | 10             | 10 X 01 = 10 |  |
|  | 04 & 05  | 05        |                |              |  |
| (Question  | Number : 02) - Total:                                | 15        | 10             | 10           |  |
|  | C: Long Answer Type Questions (Carrying 5 mark each) |           |                |              |  |
| Group  | Unit   | To be set | To be Answered | Total Marks  |  |
| В  | 01 & 02  | 04        |                |              |  |
| С  | 03   | 02        | 05             | 05 X 08 = 40 |  |
| D  | 04 & 05  | 03        |                |              |  |
| (Question Num  | (Question Number : 03 to 11) – Total: 09 05          |           |                |              |  |
| Allotment of Sub – Total (A+B) Marks:                      |  |           |                | 20           |  |
| Allotment of Sub – Total (C) Marks:                        |  |           |                | 40           |  |
| Allotment of Total (A+B+C) Marks for END Semester:         |  |           |                | 60           |  |

# 6. Rubrics for the Assessment of Student's Activity:

| Sl.<br>No. | Performance Indicators  | Weightage in % |
|------------|---|----------------|
| 01.        | Originality of completing the Assigned task / micro-project work. | 50             |
| 02.        | Presentation Skill.   | 30             |
| 03.        | In time submission of assignment work / micro-project work.       | 10             |
| 04.        | Viva voce   | 10             |
|            | Total:  | 100            |

# 7. Suggested Learning Resources:

| Sl.<br>No. | Title of Book                    | Author                         | Publication                            |
|------------|----------------------------------|--------------------------------|--|
| 01.        | Principle of Electrical Machines | V. K. Mehta<br>Rohit Mehta     | S. Chand & Co. Pvt. Ltd.,<br>New Delhi |

# Prerequisite: Having fundamental knowledge of Computers programming and elementary mathematical or logical operations.

#### Aim

- 1. To study the core concepts of Artificial Intelligence.
- 2. To study different applications of Artificial Intelligence

# Course Objective:

To impart an exposure on Artificial Intelligence and its applications in GIS using powerful features of AI which involves

- 1. To understand the various characteristics of Intelligent agents
- 2. To learn the different search strategies in Al
- 3. To learn to represent knowledge in solving Al problems
- 4. To understand the different ways of designing software agents
- 5. To know about the various applications of Al.

# **Course Content:**

|         | Content (Theory)   |          | Hrs./Unit |
|---------|--|----------|-----------|
| Unit:1  | INTRODUCTION  1.1 Introduction—Definition  1.2 Future of Artificial Intelligence  1.3 Characteristics of Intelligent Agents  1.4 Typical Intelligent Agents  1.5 Problem Solving Approach to Typical AI problems.  |          | 9         |
| Unit: 2 | PROBLEM SOLVING METHODS  2.1 Problem solving Method  2.2 Search Strategies- Uninformed - Informed - Heuristics  2.3 Local Search Algorithms and Optimization Problems - Searching with Partial Observations  2.4 Constraint Satisfaction Problems - Constraint Propagation  2.5 Backtracking Search - Game Playing - Optimal   | Module 1 | 9         |
| Unit: 3 | KNOWLEDGE REPRESENTATION  3.1 First Order Predicate Logic  3.2 Prolog Programming – Unification  3.3 Forward Chaining  3.4 Backward Chaining  3.5 Resolution  3.6 Knowledge Representation  3.7 Ontological Engineering-Categories and Objects  3.8 Events - Mental Events and Mental Objects  3.9 Reasoning Systems for Categories – Reasoning with Default Information | Module 2 | 9         |

| Unit-4 | SOFTWARE AGENTS 4.1 Architecture for Intelligent Agents 4.2 Agent communication 4.3 Negotiation and Bargaining 4.4 Argumentation among Agents 4.5 Trust and Reputation in Multi-agent systems   |          | 9  |
|--------|---|----------|----|
| UNIT-5 | APPLICATIONS 5.1 All applications 5.2 Optical character recognition. 5.3 Handwriting recognition. 5.4 Speech recognition. 5.5 Face recognition. 5.6 Artificial creativity. 5.7 Computer vision. 5.8 Virtual reality. 5.9 Image processing | Module 3 | 9  |
|        | Total   |          | 45 |

# **Examination Scheme of ESE (End Semester Examination)**

|             | Question Type                                      | Question to be set  | Questions to be answered | Marks |
|-------------|--|---|--------------------------|-------|
|             | MCQ type questions carrying 1 mark.                | 15  | 10                       | 10    |
| Theoretical | Fill in the blanks type questions carrying 1 mark. | 15  | 10                       | 10    |
|             | Subjective type questions carrying 5 marks.        | 10<br>(At least 3 questions<br>from each of 3<br>modules) | 8                        | 40    |
| TOTAL       |  |   |                          | 60    |

#### Text Books:

#### **Course Outcomes:**

6.

# Upon completion of the course, the students will be able to:

- Use appropriate search algorithms for any AI problem
- Represent a problem using first order and predicate logic
- Provide the apt agent strategy to solve a given problem
- Design software agents to solve a problem
- Design applications for NLP that use Artificial Intelligence.

| Semester: VI                              |  |
|---|--|
| Course Code: OE                           |  |
| Course Title: Operations Research         |  |
| Number of Credit: 3 (L - 3; T - 0; P - 0) |  |
| Prerequisite: Nil                         |  |
| Course Category: OE                       |  |

# **Course Objectives:**

- 1. To understand and analyze managerial problems in industry so that they are able to use resources (capitals, materials, staffing, and machines) more effectively.
- 2. To acquire knowledge of formulating mathematical models for quantitative analysis of managerial problems in industry.

# Course Contents (Theory):

| Unit:1   | 1.Development:   |
|----------|--|
|          | 1.1 Definition, Characteristics and phase of Scientific Method, Types of models. |
|          | 1.2 General methods for solving operations research models.                      |
| Unit: 2  | 2. Allocation:   |
| Offic. 2 | 2.1 Introduction to linear programming formulation,                              |
|          | 2.2 Graphical solution, Simplex Method, Artificial variable technique, Duality   |
|          | principle. Sensitivity analysis.   |
| Unit: 3  | 3. Transportation Problem:   |
|          | 3.1 Formulation.   |
|          | 3.2 Optimal solution.  |
|          | 3.3 Unbalanced Transportation problems.  |
|          | 3.4 Degeneracy.  |
|          | 3.5 Assignment problem: Formulation, Optimal solution.                           |
| Unit: 4  | 4. Sequencing:   |
|          | 4.1 Introduction.  |
|          | 4.2 Terminology.   |
|          | 4.3 Notations and Assumptions.   |
|          | 4.4 Problems with n-jobs and two machines.                                       |
|          | 4.5 Optimal sequence algorithm.  |
|          | 4.6 Problems with n-jobs and three machines.                                     |
| Unit: 5  | 5. Theory of games:  |
|          | 5.1 Introduction;  |
|          | 5.2 Two-person zero-sum games;   |
|          | 5.3 The Maximum–Minimax principle;   |
|          | 5.4 Games without saddle points;   |
|          | 5.5 Mixed Strategies; 2 x n and m x 2 Games;                                     |
|          | 5.6 Graphical solutions;   |

|  | 5.7 Dominance property;   |
|--|---------------------------|
|  | 5.8 Use of L.P. to games. |
|  |                           |

| 1.      | Operations Research: Principles and Applications | G. Srinivasan,       | PHI Learning Privat Limited. |  |
| 2.      | Operations Research: An Introduction -           | Hamdy A. Taha        | Pearson.                     |  |
| 3.      | Operations Research:<br>Concepts and Cases       | Hillier and Liberman | McGraw-Hill                  |  |

# **Course Outcomes:**

At the end of the course, the student will be able to:

- 1. Recognize the importance and value of Operations Research and mathematical modeling in solving practical problems in industry.
- 2. Formulate a managerial decision problem into a mathematical model.
- 3. Understand Operations Research models and apply them to real-life problems.
- 4. Understand and implement the Transportation Models and Assignment Models at workplace.
- 5. Understand the characteristics of different types of decisions.

| UNIT 2: Advances in Soft Computing Tools   | 7  | В |  |  |
| Fuzzy Logic, Theory and applications, Fuzzy Neural networks, Concept of Pattern Recognition, Data Mining Concepts.   |    |   |  |  |
| UNIT 3: Artificial Neural Networks   | 10 | В |  |  |
| Neuron, Nerve structure and synapse, Artificial Neuron and its model, activation functions, Neural network architecture: single layer and multilayer feed forward networks, recurrent networks. Back propagation algorithm, factors affecting back propagation training, applications. |    |   |  |  |
| UNIT 4: Evolutionary Computing Methods & GA  | 10 | С |  |  |

# West Bengal State Council of Technical & Vocational Education and Skill Development (Technical Education Division)

Evolutionary Computing Methods: **Principles of Evolutionary Processes and genetics**, A history of Evolutionary computation and introduction to evolutionary algorithms, Genetic algorithms, Evolutionary strategy, Evolutionary programming, Genetic programming.

Genetic Algorithm and Genetic Programming: Basic concepts, working principle, procedures of GA, flow chart of GA, Genetic representations, (encoding) Initialization and selection, Genetic operators, Crossover, Mutation, Convergence of GA, Bit wise operation in GA, applications.

# **UNIT 5:** Swarm Optimization & Application

9

C

Swarm Optimization: Introduction to Swarm intelligence, Ant colony optimization (ACO), Particle swarm optimization (PSO).

Application: Production, Distribution and Transportation (or field related to the branch of study in the form of Design, control and optimization).

#### Course outcomes

At the end of the course, the student will be able to:

- CO1: Classify and differentiate problem solving methods and tools.
- CO2: Apply A\*, AO\*, Branch and Bound search techniques for problem solving.
- CO3: Formulate an optimization problem to solve using evolutionary computing methods.
- CO4: Design and implement GA, PSO and ACO algorithms for optimization problems in Mechanical Engineering.
- CO5: Apply soft computing techniques for design, control and optimization of Manufacturing systems.

### **Course Objectives:**

## Following are the objectives of this course:

- To understand the contract management and associated labour laws.
- To prepare and understand the principles involved in site layout.
- To know the procedure for scheduling of various activates in construction project.
- To understand the labour laws, procedure for arbitration, settlements.
- To know different safety measures in construction projects.

| Module A/ Group A  | Unit I and II        |
| Module B/ Group B  | Unit III             |
| Module C/ Group C  | Unit IV and V        |

### Course Content:

#### Unit - I Construction industry and management

- Organization-objectives, principles of organization, types of organization: government/public and private construction industry, Role of various personnel in construction organization
- Agencies associated with construction work- owner, promoter, builder, designer, architects.
- Role of consultant for various activities: Preparation of Detailed Project Report (DPR), monitoring of progress and quality, settlement of disputes, documentation of incidents and solutions adopted at site. SWOT analysis in construction.
- Cost effective Construction

# **Unit - II Site Layout**

- Principles governing site layout.
- Factors affecting site layout.
- Preparation of site layout.
- Land acquisition procedures and providing compensation.

# **Unit- III Planning and scheduling**

• Identifying broad activities in construction work & allotting time to it, Methods of Scheduling, Development of bar charts, Merits & limitations of bar chart.

- Elements of Network: Event, activity, dummy activities, Precautions in drawing Network, Numbering the events.
- CPM networks, activity time estimate, Event Times by forward & backward pass calculation, start and finish time of activity, project duration. Floats: Types of Floats-Free, independent and total floats, critical activities and critical path,
- Purpose of crashing a network, Normal Time and Cost, Crash Time and Cost, Cost slope, Optimization of cost and duration.
- Material Management- Ordering cost, inventory carrying cost, Economic Order Quantity
- Store management, various records related to store management, inventory control by ABC technique, Introduction to material procurement through portals (e.g. www.inampro.nic.in)

## **Unit IV Construction Contracts and Specifications**

- Types of Construction contracts
- Contract documents, specifications, general special conditions
- Contract Management, procedures involved in arbitration and settlement (Introduction only)

### **Unit-V Safety in Construction and Labour Laws**

- Safety in Construction Industry—Causes of Accidents, Remedial and Preventive Measures.
- Labour Laws and Acts pertaining to Civil construction activities (Introduction only)

# **Suggested learning resources**

- 1. Sharma S C and Deodhar S V, Construction Engineering and Management, Khanna Book Publishing, New Delhi
- 2. Gahlot,P.S. and Dhir, B.M Construction planning and management New Age International (P) Ltd. Publishers, New Delhi.
- 3. Shrivastava, U.K., Construction planning and management, Galgotia Publication Pvt Ltd. New Delhi

- 12. Jha, Kumar Neeraj, Construction Project Management, Pearson Publication.
- 13. Barrie D.S., Professional Construction Management, McGraw Hill, New York.

#### **Course outcomes:**

After completing this course, student will be able to:

- Understand the contract management and associated labour laws.
- Prepare and understand the nuances of executing the site layout.

- Prepare networks and bar charts for the given construction project.
- Understand the intricacies of disputes, related arbitration and settlement laws.
- Apply safety measures at construction projects.

# **Course Objectives:**

# Following are the objectives of this course:

- To know various sources of solid.
- To learn techniques of collection and transportation of solid waste.
- To know various methods of disposal of solid waste.
- To understand and identify different biomedical and E-waste and their subsequent disposal techniques.

| Module /Group [as per directives from WBSCT&VE&SD in framing questions of end semester] | Distribution of unit |
|---|----------------------|
| Module A/Group A  | Unit I and II        |
| Module B/Group B  | Unit III and V       |
| Module C / Group C  | Unit IV              |

#### **Course Content:**

#### **Unit - I Introduction**

• Definition of solid waste, different solid waste – domestic Waste, commercial waste, industrial waste, market waste, agricultural waste, biomedical waste, E-waste, hazardous waste, institutional waste, etc.

- Sources of solid waste, Classification of solid waste hazardous and non- hazardous waste.
- Composition of municipal solid waste.

# Unit- II Storage, Collection and Transportation of Municipal Solid Waste

- Collection, segregation, storage and transportation of solid waste.
- Tools and Equipment-Litter Bin, Broom, Shovels, Handcarts, Mechanical road sweepers, Community bin like movable and stationary bin.
- Transportation vehicles with their working capacity -Animal carts, Auto vehicles, Tractors or Trailers, Trucks, Dumpers, Compactor vehicles. Transfer station- meaning, necessity, location.
- Role of rag pickers and their utility for society.

## Unit- III Composting of Solid Waste

- Concept of composting of waste, Principles of composting process. Factors affecting the composting process.
- Methods of composting Manual Composting Bangalore method, Indore Method, Mechanical Composting Dano Process, Vermi composting.

#### Unit IV Techniques for Disposal of Solid Waste

- Solid waste management techniques solid waste management hierarchy, waste prevention, waste reduction, reusing, recycling and materials recovery techniques (Only introduction)
- Land filling technique, Factors to be considered for site selection, Land filling methods-Area method, Trench method and Ramp method, Leachate and its control, Biogas from landfill, Advantages and disadvantages of landfill method, Recycling of municipal solid waste, Ill effects of unplanned solid waste dumping
- Incineration of waste: Introduction of incineration process, Types of incinerators Flash, Multiple chamber Incinerators, Products of incineration process with their use, Pyrolysis of waste Definition, Methods
  - Energy generation from Waste (elementary idea)

# Unit- V Biomedical and E-waste management

- Definition of Bio medical Waste.
- Sources and generation of Biomedical Waste and its classification
- Bio medical waste Management technologies.
- Definition, varieties and ill effects of E- waste,
- Recycling and disposal of E- waste.

### Suggested learning resources:

- 1. Gupta O.P, Elements of Solid Hazardous Waste Management, Khanna Book Publishing Co., Delhi Ed. 2018
- 2. Bhide, A. D., Solid Waste Management, Indian National Scientific Documentation Centre, New Delhi.
- 3. George Techobanoglous, Kreith, Frank., Solid Waste, McGraw Hill Publication, New Delhi.
- 4. Sasikumar, K., Solid Waste Management, PHI learning, Delhi.
- 5. Hosetti, B.B., Prospect and Perspectives of Solid Waste Management, New Age International Publisher.
- 6. V. Rajaram, F.Z. Siddiqui, S. Agarwal, M. E. Khan, Solid and Liquid Waste Management, PHI learning, Delhi.

### **Course outcomes:** After competing this course, student will be able to:

- Identify the sources of solid waste.
- Select the relevant method of collection and transportation of solid waste.
- Suggest an action plan for composting of solid waste.
- Devise suitable disposal technique for solid waste
- Use the relevant method for disposal of Bio-medical and E-waste.

#### Aim of the Course

This course will introduce the concept of Machine Learning through different learning methods.

# **Course Objectives**

- To learn the concept of how to learn patterns and concepts from data without being explicitly programmed
- To design and analyze various machine learning algorithms and techniques with a modern outlook focusing on recent advances.
- Explore supervised and unsupervised learning paradigms of machine learning.
- To explore Neural Network and Genetic Algorithm.

### Aim of the Course

This course will introduce the concepts of PHP frameworks, which gives a complete description about the principles, used, architectures, applications, design and implementation of web development concepts. After the completion of course, students will get hands on experience on various techniques of web development and will be able to design and develop a complete website.

# **Course Objectives**

The objective of this course is to provide the necessary knowledge to design and develop dynamic, database-driven web applications using PHP version 5. Students will learn how to connect to any ODBC-compliant database, and perform hands on practice with a MySQL database to create database-driven HTML forms and reports etc. Students also learn how to configure PHP and Apache Web Server. Comprehensive lab exercises provide facilitated hands on practice crucial to develop competence web sites.

# Course Content: Contents (Theory) Hrs./Unit Marks Module UNIT 1: 7 12 A

- Overview of PHP
- > Static vs. Dynamic Web Sites
- Dynamic Content from Databases
- Developing Dynamic Internet Applications
- Client-Side Scripting vs. Server-Side Scripting
- Overview of PHP Advantages and Capabilities
- ➤ Configuring PHP.INI
- > PHP vs. ASP
- ➤ Basic PHP
- > echo and print Statements
- Comments in PHP
- > PHP Case Sensitivity
- Defining variable and constant
- ➤ PHP Data Types
- > PHP Operators

| <ul><li>Looping Constructs - while, dowhile, for, for each</li></ul>  | ch  |  |                           |
|---|---|--|---------------------------|
| UNIT 2:   | 5   | 10   | A                         |
| <ul> <li>Introduction to the Apache Web Server - What is A - Apache Installation - Apache Virtual Host - Nam Hosts</li> <li>PHP Functions - Introduction to Functions - User I to Functions - Variable scope - Local and Global S - Returning Values from a Function - Using Include Dynamic Function Calls - Recursive Functions - P PHP Arrays - What is an Array? - Why do we use Arrays - Multidimensional Arrays - Sorting Arrays</li> <li>PHP MySQL Database and Forms</li> </ul>   | Defined Function<br>Scope - Passing<br>le Files - The Repredefined PHP<br>arrays? - Index | I Hosts - IP-ba<br>ons - Passing A<br>Arguments by<br>equire Statem<br>Functions<br>ed Arrays - As | Arguments Reference ent - |
| UNIT 3:   | 10  | 10   | В                         |
| <ul> <li>What is MySQL? - Queries - PHP's Database APIs - Configuring PHP for Database Support - MySQL vs. Access - MySQL vs. SQL Server - Forms and Program - Insert Data Into - Insert Multiple Records Into MySQL - HTTP GET, POST, And Request methods - Insert Data From a Form Into a Database - PHP MySQL Select (Retrieving Data from Forms) - PHP MySQL The Where Clause - PHP MySQL Order By Keyword - PHP MySQL Update - PHP MySQL Delete - Looping through database - PHP Functions Specific to MySQL</li> <li>Using Cookies with PHP - What is a Cookie? - How to Create a Cookie? - How to Retrieve a Cookie Value? - How to Delete a Cookie?</li> <li>PHP Sessions - What is a PHP Session - Starting a PHP Session - Storing and Retrieve Session Variable - Session Unset - Destroy A PHP Session</li> <li>Miscellaneous PHP Tasks - Error Logging - Using Environment Variables - PHP Redirect To Another URL - Getting IP Addresses from Visitors - PHP - Function preg_match()</li> </ul> |   |  |                           |
| UNIT 4:   | 6   | 8  | В                         |
| <ul> <li>PHP File Handling - String Functions</li> <li>E-Commerce Site - What is E-Commerce - E-commerce platforms on the market</li> <li>SQL Injection - Introduction</li> <li>PDO - Introduction</li> <li>Introduction to Frameworks</li> <li>Introduction to CMS (Content Management System) - WordPress</li> <li>AJAX</li> <li>Introduction to open Source CMF (Content management framework) - Codeigniter</li> </ul>  |   |  |                           |
| UNIT 5:   | 17  | 20   | С                         |
| ➤ Introduction to Codeigniter - What is a PHP Framework - MVC Pattern - Why Should we use a PHP Framework? - When to use a PHP Framework? - What are the Best PHP Frameworks Available? - Codeigniter Overview - CodeIgniter Features - CodeIgniter Basic Concepts and Application Architecture - Installing Codeigniter - Basic Configuration Options - Database Configuration - CodeIgniter - Application Architecture - Directory Structure - CodeIgniter - MVC Framework - Application URL Structure  |   |  |                           |

- Controller Introduction Calling a Controller Creating & Calling Constructor Method -Controller function - Interacting with views
- Views Views Introduction Loading the View Working with configuration layout Creating custom layout Controller variables and parameters CodeIgniter URLs Passing argument through url Redirection Form and Getting post data
- Models Model Introduction Creating Model Class User defined function in model -Connecting to a Database - Automatic Connecting - Manual Connecting - Inserting Data to Database - Fetching data - Deleting data - Updating data
- ➤ Helpers Helpers Introduction Array Helper, Cookie Helper, Date Helper, URL Helper, etc.. Loading a Helper Auto load Configuration
- Session Management Initializing a Session Add Session Data To retrieve all session data To remove all session data Retrieve Flashdata
- Cookie Management

# **Course outcomes**

### Student should be able to

| Sl.<br>No.  | Description   | Bloom's Taxonomy Level |
|---|---|------------------------|
| 1   | <b>Understand</b> the functionality of the various PHP syntax     | Knowledge, Understand  |
| 2   | <b>Appreciate</b> the strengths and limitations of PHP Frame Work | Apply, Create          |
| 3   | <b>Explain</b> the analyzing techniques of CodeIgniter            | Analyze                |
| 4   | <b>Describe</b> different methodologies used in web Designing.    | Analyze                |
| Compare different approaches of web designing with various technologies.  Develop different type of Web Application in 6th Semester Project work. |   | Evaluating             |

Note: Development of Web-page can be done as Project work. Also seminar can be presented on topics of this subject.

| 2     | Quizzes, viva-voce,<br>Assignments               | 10    | Question carrying 8 marks for 5 Qs out of 9 Qs.  | 8 x 5=40 |
| 3     | Class Attendance                                 | 10    |  |          |
|       | Total  | 40    |  | 60       |

# **Course Objectives:**

Students will acquire knowledge, skill and attitude to have following attributes.

- 1. Gather concept about energy control and its importance
- 2. Understand about different energy considerations in metallurgical industries
- 3. Gather knowledge about energy audit
- 4. State about different processes of energy conservation and recovery

# Course Outcomes (COs):

**Subject: Energy and Environment Control in Metallurgical Industries** 

After successful completion of this course, the students will be able to:

| Course    | Statement   |
|-----------|---|
| MTPC304.1 | Describe energy control and its importance                          |
| MTPC304.2 | Explain different energy considerations in metallurgical industries |
| MTPC304.3 | Describe energy audit and its importance.                           |
| MTPC304.4 | Explain different processes of energy conservation and recovery.    |

# UNIT WISE DIVISION OF THE SYLLABUS

| UNIT | TOPIC  | CONTACT PERIODS |
|------|--|-----------------|
| 1    | Introduction                                     | 3               |
| 2    | Energy consideration in metallurgical industries | 9               |
| 3    | Energy conservation and recovery                 | 9               |
| 4    | Energy audit                                     | 9               |
|      | Total =  | 30              |

# Reference Books: -

- 1. Energy Management in Iron & Steel works The Iron & Steel Institute, 1988.
- 2. New Energy Saving Technologies Operation Experience I.I.S.I.
- 3. Statistics on Energy in Steel Industry I.I.S.I.
- 4. Steel & Energy -- I.I.S.I.
- 5. National Seminar on Energy for Steel Industry, 23-29 Sep 1977, Rourkela, IIM.
- 6. National Seminar on Specific Energy Consumption in the Iron & Steel Industry,10-12 Dec.1982, Jamshedpur, IIM.
- 7. Seminar on Energy Conservation in Steel Industry, 14, Dec, 1991, :Bhilai IIM.
- 8. Symposium on Exploring Alternative Source of Energy Conservation in Steel Industry, 14-15 Dec, 1984, Bhadravati, IIM.

# DETAIL COURSE CONTENT

- 1.0 Introduction: 3 PERIODS
- 1.1 Concept of Energy control and auditing
- 1.2 Its importance in industries under present scenario, cost control
- 1.3 Concept of energy management
- 2.0 Energy consideration in metallurgical industries : 9 PERIODS
- 2.1 Energy consumption in Metallurgical Industries
- 2.2 Application of thermodynamic principles and energy balance
- 2.3 Different types of Fuels and their utility
- 2.4 Energy consumption in electrometallurgical extraction processes, Rolling mill, Forging shop, Blast furnace, Arc furnace, L-D furnace, Induction furnace, Cupola, Heat treatment furnace etc.
- 3.0 Energy conservation and recovery: 9 PERIODS
- 3.1 Concept of energy conservation
- 3.2 Different types & utility
- 3.3 Recovery processes
- 4.0 Energy audit : 9 PERIODS
- 4.1 Theory & concept of Energy audit & its management
- 4.2 Conventional and non-conventional energy sources, their utility

# Syllabus Network Security Management and Administration (Theory)

| Course Title   | Network Security Management and Administration (Open Elective-2) |  |
|--|--|--|
| Course Code:OE2  | Semester: Sixth  |  |
| Duration: Six Months   | Maximum Marks:100  |  |
| Teaching Scheme  | Examination Scheme   |  |
| Theory: 3 hrs./week  | Mid Semester Test: 20 Marks,                                     |  |
|  | Quizzes, Viva-voce, Assignment: 10 Marks                         |  |
| Total hours: 48  | Class Attendance: 10 Marks                                       |  |
| Credit: 2.5 End Semester Exam.: 60 Marks   |  |  |
| Pass Criterion: Students have to obtain at least 40% marks (pass marks) in both internal assessment and end semester examination separately. |  |  |

Pre-Requisites: Familiarization with Network components such as Router, Switch, LAN, Firewall etc.) and Computer networking.

# **Course Objectives:**

- ❖ Introduction to network management and Administration.
- ❖ Introduction to network faults and troubleshooting.

**Course Outcomes:** The students will be able to –

- Describe the different types of network directory services.
- \* Know the network management and administration.
- ❖ Apply the different types of network technologies for internet connection.
- \* Troubleshoot and repair the network faults.

# **Course Content**

Unit-1 5 hours

# 1. Introduction

- 1.1 Duties of the System Administrator Linux as well as other OS Administrator, Steps of Installing and Configuring Servers.
- 1.2 Planning the Network describing the Topologies, planning and Implementing the Security.

Unit-2 20 hours

### 2. Network Services

- 2.1. Configuring Printer
- 2.2. TCP/IP Networking Understanding Network Class, Configuring the Network, Exploring Directory Services and Remote Network Access.
- 2.3. The Network File System NFS overview, Configure an NFS Server, Configure an NFS Client, NFS Security.
- 2.4. Network Related Jobs Network Administrator, Network Engineer, Network Architecture / Designer, Other Network Related Jobs.
- 2.5. Directory Services Define Directory Services, Definition of Novelle Directory, Windows NT domains, Microsoft's Active Directory, X500 Directory Access Protocol, Lightweight Directory Access Protocol, Forests, Trees, Roots and Leaves. Configuring Samba Server
- 2.6. Active Directory Architecture Object Types, Object Naming, Canonical Names, LDAP Notation, Globally unique identifiers, User Principle Names, Domain, Trees & Forests.
- 2.7. Remote Network Access Need of Remote Network Access, Public Switched Telephone Network, Integrated Services Digital Network, Digital Subscriber Line, CATV.
- 2.8. Virtual Private Network VPN Protocols, Types of VPNs, VPN Clients, SSL VPNs

Unit-3 15 hours

# 3. Network Connection and Printing Services

- 3.1 Dynamic Host Configuration Protocol (DHCP) DHCP Origins, Reverse Address Resolution Protocol (RARP), The Bootstrap Protocol (BOOTP), DHCP Objectives, IP Address Assignment, DHCP Architecture.
- 3.2 Introduction to Domain Name System(DNS) DNS Objectives, Domain Naming, Top Level Domains, Second Level Domains, Sub domains, DNS Functions, Resource Records, DNS Name Resolution, Resolves, DNS Requests, Root Name Servers, Resolving a Domain Name, DNS Name Registration.
- 3.3 Understand Network Printing Concepts Understand Network Printing Concepts, locally connected print devices, setting up local print devices, Shared print devices, Sharing Locally Attached Print Devices, Describe Windows Network Printing, and Add Print Wizard

Unit-4 9 hours

# 4. Implementation of Network

- 4.1 Designing Network Accessing Network Needs, Applications, Users, Network Services, Security and Safety, Growth and Capacity Planning, Meeting Network, Needs Choosing Network Type, Choosing Network Structure, Choosing Servers.
- 4.2 Configuring a Database Server
- 4.3 Creating VNC Server
- 4.4 Providing Additional Network Services Configuring a Time Server, Providing a Caching Proxy Server.
- 4.5 Optimizing Network Services

Unit-5 9 hours

# 5. Administering Windows and Linux Server (The Basics)

- 5.1 Working with User Accounts Adding a User, Modifying User Account, Deleting or Disabling a User Account.
- 5.2 Working with Windows Security Groups Creating Group, Maintaining Group Membership.
- 5.3 Working with Shares Understanding Share Security, Cresting Shares, Mapping Drives
- 5.4 Administering Printer Shares Setting up Network Printer,

Unit-6 6 hours

# 7. Troubleshooting and security of Network

- 7.1 Understanding the Problem Troubleshooting, Segmenting the Problem, Isolating the Problem, Setting Priorities.
- 7.2 Troubleshooting Tools Hardware Tools, Software Tools, Monitoring and Troubleshooting Tools
- 7.3 Internal Security Account Security, File and Directory permissions, Practices and user education.
- 7.4 External Threats Front Door threats, Back Door threats, Denial services threats, Viruses, worms and other Malicious codes

# **Text books:**

# Windows Portion:

1. Windows Server Security. A Technical Reference. Roberta Bragg. Addison-Wesley

# Linux Portion:

2. Linux Administration Handbook. Second Edition. Evi Nemeth, Garth Snyder, Trent R. Hein. Prentice Hall

# **Syllabus for Internet of Things (Theory)**

| Course Title   | Internet of Things (Open Elective – 2)   |  |  |
|--|--|--|--|
| Course Code: OE2- CFS 310  | Semester: sixth                          |  |  |
| Duration: Six Months   | Maximum Marks:100                        |  |  |
| Teaching Scheme  | Examination Scheme                       |  |  |
| Theory: 3 hrs./week  | Mid Semester Test: 20 Marks,             |  |  |
|  | Quizzes, Viva-voce, Assignment: 10 Marks |  |  |
| Total hours: 48  | Class Attendance: 10 Marks               |  |  |
| Credit: 2.5  | End Semester Exam.: 60 Marks             |  |  |
| Pass Criterion: Students have to obtain at least 40% marks (pass marks) in both internal assessment and end semester examination separately. |  |  |  |
| Pre-Requisites: Networking and Communication Protocols   |  |  |  |

# **Course Objectives:**

❖ Internet of Things (IoT) is presently an important technology with wide ranging interest from Government, academia and industry. IoT cuts across different application domain verticals ranging from civilian to defence sectors which includes agriculture, space, health care, manufacturing, construction, water, mining, etc. Today it is possible to build different IoT solutions such as shopping system, infrastructure management in both urban and rural areas, remote health monitoring and emergency notification systems, and transportation systems. Therefore, it is very important to learn the fundamentals of this emerging technology.

**Course Outcomes:** After completion of the course students will be able to learn the following major themes:

- ❖ Gain a good understanding of various aspect of IoT.
- ❖ Gain detailed knowledge of some IoT tools.
- ❖ Develop basic implementation skills of IoT.
- Understand how connected devices work together to update other applications.
- ❖ Acquire knowledge to interface sensors and actuators with microcontroller based Arduino platform.
- ❖ Writing C programs in Arduino IDE .

# **Course Content**

Unit-1 10 hours

# 1. Introduction to IoT

- 1.1. Fundamentals
- 1.2. Sensing
- 1.3. Actuation

| Unit-2 | 10 hour |
|--------|---------|
| Unit-Z | TV nou  |

# 2. Networking

- 2.1 Basics of IoT Networking
- 2.2 Communication Protocols
- 2.3 Sensor networks

Unit-3 10 hours

# 3. Arduino Programming

- 3.1 Introduction to Arduino programming
- 3.2 Integration of Sensors/Actuators to Arduino

Unit-4 10 hours

# 4. Implementation

- 4.1 Implementation of IoT with Raspberry Pi
- 4.2 Data Handling Analytics

Unit-5 8 hours

# 5. Case Studies

- 5.1 Agriculture
- 5.2 Healthcare
- 5.3 Activity Monitoring

# **Text books:**

- 1. Pethuru Raj and Anupama C. Raman, "The Internet of Things: Enabling Technologies, Platforms, and Use Cases", CRC Press.
- 2. Dr. Jeeva Jose, "Internet of Things", 2017, Khanna Publishing House.

# **Reference books:**

- 1. Arshdeep Bahga and Vijay Madisetti, "Internet of Things: A Hands-on Approach" Universities Press.
- 2. Raj Kamal, "Internet of Things: Architecture and Design Principles", McGraw Hill Education.

# Syllabus Network Security Management and Administration (Practical)

| Course Title                           | Network Security Management and Administration Lab (Open Elective-2) |                      |                     |  |  |
|--|--|----------------------|---------------------|--|--|
| Course Code: OE2-CFS320                | Semester: S  | ixth                 |                     |  |  |
| Duration: Six Months                   | Maximum Marks:100  |                      |                     |  |  |
| Teaching Scheme                        | Continuous Assessment-60   |                      |                     | End Semester Assessment-40               |  |
| Practical: 3 hrs./week Total hours: 48 | Assignments ( to be allotted)  | Class<br>Performance | Class<br>Attendance | Assignment<br>on the day of<br>Viva-voce | Viva-voce<br>(Before<br>Board of<br>Examiners) |
| Credit: 1.5                            | 30   | 20                   | 10                  | 20                                       | 20   |

Pass Criterion: Students have to obtain at least 40% marks(pass marks) in both continuous assessment and end semester Assessment separately.

Pre-Requisites: Familiarization with Network components such as Router, Switch, LAN, Firewall etc.) and Computer networking.

### **List of Practical:**

# **Installation:**

# 10 Hours

- 1. Creating Windows Server/Linux Boot Disk
- 2. Installing Windows Server/Linux
- 3. Installing Active Directory
- 4. Create new Users & give the Permission
  - a) User and group administration
  - b) Creating and deleting users from the system
  - c) Modifying user's profile
  - d) Creating and deleting groups
  - e) Important system files related to user administration

# Configuration

### 26 Hours

- 1. Configuring Linux as DHCP server
- 2. Configuring various clients for DHCP server (Windows & Linux)
- 3. Configure Network File Sharing Server
- 4. Mounting NFS exports on NFS clients
- 5. Configuring Apache Web Server
- 6. Configuring Apache for multiple sites using IP-based, port-based and name-based virtual hosting
- 7. Configuring FTP Server
- 8. Configuring SMTP services

- 9. Configuring POP3/IMAP service on Linux
- 10. Configuring samba to act as member server for Windows Network
- 11. Configuring samba service for file sharing with windows systems
- 12. Creating AD Objects
- 13. Setting up Local Print Device
- 14. Installing and Configuring a Network Capable Print Device

# Maintaining and Automation 8 Hours

- 1. Configure Backup and Disaster Recovery.
  - a. Introduction to various types of backup media
  - b. Backup and restoring data using dump / restore commands
  - c. Backup and restoring using tar and CPIO commands
- 2. Configure Logging and Monitoring
- 3. Automating Administrative Tasks

# Project: 4 Hours

1. Group of four students prepare a mini report on Latest Networking Technology

# **Syllabus Internet of Things (Practical)**

| Course Title                           | Internet of Things Lab (Open Elective-2) |                      |                     |  |   |  |
|--|--|----------------------|---------------------|--|---|--|
| Course Code: OE2-CFS322                | Semester: Si                             | xth                  |                     |  |   |  |
| Duration: Six months                   | Maximum Marks:100                        |                      |                     |  |   |  |
| Teaching Scheme                        | Continuous Assessment-60 End Se          |                      |                     | End Semester                             | emester Assessment-40                       |  |
| Practical: 3 hrs./week Total hours: 48 | Assignments ( to be allotted)            | Class<br>Performance | Class<br>Attendance | Assignment<br>on the day of<br>Viva-voce | Viva-voce<br>(Before Board<br>of Examiners) |  |
| Credit: 1.5                            | 30                                       | 20                   | 10                  | 20                                       | 20  |  |

Pass Criterion: Students have to obtain at least 40% marks (pass marks) in both continuous assessment and end semester Assessment separately.

Pre-Requisites: Networking and Communication Protocols, Operating Systems, Concepts of Web Applications.

# Skills to be developed:

After completing the module, the learner will be able to:

- Understand how connected devices work together to update other applications.
- Acquire knowledge to interface sensors and actuators with microcontroller based Arduino platform.
- Writing C programs in Arduino IDE
- Understand the Communication between microcontroller and PC using serial communication.
- Build IoT based applications and understand how data flows between things.

# **List of Laboratory Experiments:**

| LAB-I:   | Experiments based on Arduino Programming                              | 12 Hours |
|----------|---|----------|
| LAB-II:  | Experiments based on Raspberry Pi.                                    | 12 Hours |
| LAB-III: | Networking for Raspberry Pi   | 12 Hours |
| LAB-IV:  | Mini projects (using Arduino/Raspberry Pi) on topics like: Earthquake | 12 Hours |

detector, RGB color mixer, LED controller, Smoke detection with MQ-2 detector, Home automation, Water monitoring system, Voice controller air purifier, Contactless IoT doorbell, IoT temperature and

mask scan entry etc.

| Open Elective              |   |  |  |
|----------------------------|---|--|--|
| Name of the Subject        | : ECONOMIC POLICIES IN INDIA              |  |  |

| Duration:: Seventeen weeks | Marks:100                                 |  |  |
| Theory: 3 hrs./week        | Mid Semester Exam.: 20                    |  |  |
| Tutorial: Nil hr./week     | Attendance & Teacher's Assessment: 10 +10 |  |  |
| Practical: Nil hrs./week   | End Semester Exam.: 60                    |  |  |
| Credit: 3                  |   |  |  |

# Course Learning Objectives:

The objective of this course is to familiarize the students of different streams with the basic concepts, structure, proble ms and issues concerning Indian economy.

### Course Outcomes:

CO1: Understand Indian economics policy, planning strategies

CO2:It will enable to students to comprehend theoretical and empirical development across countries and region for policy purposes

CO3: Development Economics as a discipline encompasses different approaches to the problems of unemployment, poverty, income generation, industrialization from different perspectives

CO4: Able to identify the problems and capable to decide the application for future development

CO5: Analyze economic issues and find solutions to complex economic problems and take correct economic judgment

|                                | Detail Course Content   |            |  |
|--------------------------------|---|------------|--|
